Surgical Forum XLIX

Chapter I—Sepsis and Endotoxin

Inducible Nitric Oxide Synthase mRNA Expression in Rat Aortic Endothelial Cells Peaks Early Following Endotoxin Treatment in Vitro and May Propagate Hypotension in Vivo 1
Kenneth Leong, MD, Georgette Buga, PhD, Louis J. Ignarro, PhD, and H. Gill Cryer, MD, PhD

Bacterial DNA Augments Lipopolysaccharide Lethality but Induces Tolerance to Lipopolysaccharide in Vitro 4
D. Traves Crabtree, MD, Jie Zhou, MD, Webster C. Houlgrave, MS, Thomas G. Gleason, MD, Timothy L. Pruett, MD, FACS, and Robert G. Sawyer, MD

PMX-622 Prevents Endotoxin-Induced Inflammation in Humans 6
Edward Lin, DO, Susette M. Coyle, RN, MS, Simrat Randhawa, MD, Islam A. Shahin, BS, Ashwini Kumar, BS, John Meligeni, MD, PhD, Bruce Robbins, PharmD, Steve E. Calvano, PhD, and Stephen F. Lowry, MD, FACS

Chylomicron-Bound Endotoxin Inhibits Hepatocellular Nitric Oxide Production by Inhibiting Nuclear Factor κB Activation in Rats 8
Zindaba L. Kumwenda, MD, William J. Welch, PhD, and Hobart W. Harris, MD, MPH, FACS

Lipopolysaccharide-Induced Inducible Nitric Oxide Synthase Gene Expression Is Downregulated in Rats Rendered Tolerant to Endotoxin, Possibly as a Result of Enhanced Glucocorticoid Release 10
Naoki Unno, MD, Satoshi Nakamura, MD, Shozo Baba, MD, FACS, Richard A. Hodin, MD, FACS, and Mitchell P. Fink, MD, FACS

Recombinant Lipopolysaccharide-Binding Protein Augments Lipopolysaccharide Activation of Lipopolysaccharide-Tolerant Kupffer Cells 12
Richard D. Klein, MD, MPH, Stewart C. Wang, MD, PhD, William H. Alarcon, MD, Susan M. Eddy, BS, Alireza Aminlari, BS, and Grace L. Su, MD

Inhibition of Poly (Adenosine Diphosphate-Ribose) Synthetase Attenuates Dysfunction of Pulmonary Vasorelaxation in Acute Lung Injury 14
Edward J. Pulido, MD, Denis D. Bensard, MD, Brian D. Shames, MD, Craig H. Selzman, MD, and Robert C. McIntyre, Jr., MD, FACS

N-Acetylcysteine Inhibits Interleukin 6 Production by Lipopolysaccharide-Stimulated Enterocytes 16
David A. Rigberg, MD, Thane A. Blinman, MD, Frances S. Kim, BS, Michael A. Cole, BS, O. J. Hines, MD, Charles F. Chandler, MD, and David W. McFadden, MD, FACS

Endothelin Type A and B Receptor Antagonists Reduce Macrophage Response to Bacterial Endotoxin 18
James C. Doherty, MD, Gonzalo Albornoz, MD, Gregory M. Organ, MD, and Marvin A. McMillen, MD, FACS

Plasma from Patients with Systemic Inflammatory Response Syndrome Inhibits Neutrophil Apoptosis..... 19
Noel F. Fanning, FRCSI, Malcolm R. Kell, FRCS, William O. Kirwan, MCh, FRCSI, Thomas G. Cotter, DPhil, and Henry P. Redmond, MCh, FRCSI

Does Necrotic Tissue Depress Cell-Mediated Immune Function in Polymicrobial Sepsis? 22
Grace Y. Song, BA, Chun-Shiang Chung, PhD, Irshad H. Chaudry, PhD, and Alfred Ayala, PhD

Thermal Preconditioning Protects Against Endotoxin-Induced Acute Lung Injury 24
Hazem Abdih, FRCSI, Cathal Kelly, FRCSI, and David Bouchier-Hayes, FRCSI, FACS

Chapter II—Resuscitation and Care

Prostaglandin E_2 Receptor Antagonist SC-19220 Improves Neutropenia and Survival in Burn Sepsis..... 26
Margo Shoup, MD, Julia L. Wang, MS, Richard L. Gamelli, MD, FACS, and Ravi Shankar, PhD

Dehydroepiandrosterone: A Novel Steroid Hormone for Restoring T-Lymphocyte Function After Trauma and Hemorrhage 27
Robert A. Catania, MD, Martin K. Angele, MD, Alfred Ayala, PhD, William G. Cioffi, MD, FACS, Kirby I. Bland, MD, FACS, and Irshad H. Chaudry, PhD

The Biochemical Basis for the Hypercoagulable State Seen in Cushing's Syndrome 29
Robert C. Jacoby, MD, John T. Owings, MD, FACS, Theresa Ortega, DVM, Robert Gosselin, MT, and Felix D. Battistella, MD, FACS

Noninvasive Near Infrared Spectroscopic Assessment of Abdominal Wall Muscle pH in Hemorrhagic Shock and Its Relationship to Gastric Intramucosal pH 32
Juan Carlos Puyana, MD, FRCSC, FACS, Babs Soller, PhD, Songbiao Zhang, PhD, Ron Micheels, PhD, and Stephen Heard, MD

Simultaneous Blockade of Selectins Attenuates Liver Injury After Uncontrolled Hemorrhagic Shock and Resuscitation 34
Fernando A. Rivera-Chavez, MD, Luis H. Toledo-Pereyra, MD, PhD, FICS, Dean T. Nora, MD, Ben L. Bachulis, MD, FACS, and Richard E. Dean, MD, FACS

Effect of Hypoxia on Bone Marrow Myeloid and Erythroid Progenitor Cells..... 35
Dennis Quinlan, Jr., MD, Pranela Rameshwar, PhD, Carl Hauser, MD, FACS, and David Livingston, MD, FACS

Beneficial Effects of a Novel Nitric Oxide Scavenger in Reducing Tissue Injury and Improving Survival After Hemorrhagic Shock 37
Nishit S. Shah, MB, ChB, Jörg Kalff, MD, Timothy R. Billiar, MD, FACS, Andrew B. Peitzman, MD, FACS, Anthony Bauer, PhD, and Brian G. Harbrecht, MD

Carbon Dioxide Pneumoperitoneum During Laparoscopy Does Not Worsen the Hemodynamic Effects of Acute Mesenteric Ischemia 38
Ann M. Neuhaus, MD, Hung S. Ho, MD, Eric T. London, MD, and Bruce M. Wolfe, MD, FACS

Alveolar Recruitment-Derecruitment Is the Primary Mechanism by Which Normal Lung Volume Changes During Mechanical Ventilation 40
David E. Carney, MD, Carl E. Bredenberg, MD, Mark F. Fillinger, MD, Henry Schiller, MD, Anthony L. Picone, MD, PhD, FACS, and Gary F. Nieman, BS

Male and Female Sex Steroids: Do They Produce Deleterious or Beneficial Effects on Immune Responses After Trauma and Hemorrhage? 43
Martin K. Angele, MD, Markus W. Knöferl, MD, Alfred Ayala, PhD, William G. Cioffi, MD, FACS, Kirby I. Bland, MD, FACS, and Irshad H. Chaudry, PhD

Should Body Temperature Be Maintained at Normothermia or Hypothermia During Resuscitation After Trauma and Hemorrhage? 45
Yasuaki Mizushima, MD, Ping Wang, MD, William G. Cioffi, MD, FACS, Kirby I. Bland, MD, FACS, and Irshad H. Chaudry, PhD

Interaction of Nitric Oxide and Endothelin on Microvascular Permeability 48
Gregory P. Victorino, MD, Vicky L. Tucker, PhD, and David H. Wisner, MD, FACS

Chapter III—Metabolism and Nutrition

Growth Hormone Treatment with Heart Failure Improves Ventricular Pump Function and Reduces Myocyte Apoptosis 51
Jeffrey S. Mandel, MD, Ward Houck, MD, Lydia C. Pan, PhD, Stephen Krombach, BA, Mark J. Clair, BS, Fred A. Crawford, Jr., MD, FACS, and Francis G. Spinale, MD, PhD

Evidence for a New Glutaminase Isoenzyme in Rat Tissues 52
Khaled M. Elgadi, MD, Wiley W. Souba, MD, ScD, FACS, and Steve F. Abcouwer, PhD

High-Dose Vitamin C Enhances Hepatic Glutathione Levels and Increases Survival of Septic Rats 55
Yasusuke Miyagatani, MD, Jan D. Rounds, BS, Elizabeth A. Chambers, MS, Malcolm K. Robinson, MD, and Danny O. Jacobs, MD, MPH, FACS

Anabolic Effects of Administration of Recombinant Human Insulin-Like Growth Factor I/Binding Protein 3 on Protein Metabolism in Adult Burn Patients 56
Meelie A. DebRoy, MD, Xiao-Jun Zhang, PhD, Steven E. Wolf, MD, Robert R. Wolfe, PhD, and David N. Herndon, MD, FACS

Induced Nitric Oxide Synthesis Is Modulated by Increased Arginase Activity After Trauma 58
Patricia L. Figert, MD, Curtis Wray, BS, Mary E. Malley, BS, Gloria L. Gellin, MS, Paul A. Kearney, MD, FACS, and Juan B. Ochoa, MD

Protein Stability Regulates Glutamine Synthetase Expression in Stressed Rats 60
Brian I. Labow, MD, Steve F. Abcouwer, PhD, and Wiley W. Souba, MD, ScD, FACS

Protein-Calorie Malnutrition Increases Apoptosis in Peritoneal Macrophages 62
David E. Rivadeneira, MD, Stephen R. Grobmyer, MD, Hassan A. Naama, MD, Kotha Subbaramaiah, PhD, Peter J. Mackrell, MD, and John M. Daly, MD, FACS

Dopamine, Not Serotonin, Is Responsible for Anorexia During Sepsis 64
Maurizio Muscaritoli, MD, Giovanni F. Torelli, MD, Michael M. Meguid, MD, PhD, FACS, Go Miyata, MD, PhD, Serguei Fetissov, MD, PhD, and Filippo Rossi Fanelli, MD

Ca^{2+}-Dependent Release of Myofilaments Increases in Skeletal Muscle During Sepsis 66
Arthur B. Williams, MD, Josef E. Fischer, MD, FACS, and Per-Olof Hasselgren, MD, FACS

Sodium Salicylate Inhibits Tumor Necrosis Factor Production in Lipopolysaccharide-Stimulated Macrophages 69
Frank J. Vittimberga, Jr., MD, Richard A. Perugini, MD, Theodore P. McDade, MD, Rebecca C. Carrigan, BA, and Mark P. Callery, MD, FACS

Transcriptional Effect of Surgical Wounding or Sequential Thermal Injury and Hemorrhage on Jejunal Inflammatory Response 71
Fred A. Luchette, MD, FACS, John F. Valente, MD, FACS, Lou Ann Friend, RVT, Ju-Xian Mao, MD, and Cora K. Ogle, PhD

Chapter IV—Cytokines and Inflammation

Identifying a Role for Endogenous Interleukin-1 Receptor Antagonist in the Inflammatory Response to a Turpentine Abscess 74
Michael D. Josephs, MS, MD, Michael W. Taylor, MD, Jason J. Rosenberg, MS, MD, Amer S. Abouhamze, BS, David Hirsh, PhD, Emmet Hirsch, MD, Edward M. Copeland III, MD, FACS, and Lyle L. Moldawer, PhD

Cyclooxygenase-2 Upregulation Following Trauma 76
Peter J. Mackrell, MD, Juan Mestre, MD, Eun K. Yang, PhD, Martin McCarter, MD, David E. Rivadeneira, MD, Olga Tucker, MD, Philip Stapleton, PhD, Andrew Dannenberg, MD, and John M. Daly, MD, FACS

Essential Role of Induced Nitric Oxide in Intestinal Inflammation and Stasis Following Hemorrhagic Shock 78
Christian Hierholzer, MD, John Menezes, MD, Jörg C. Kalff, MD, Raphael T. Villavicencio, MD, Brian Harbrecht, MD, Timothy R. Billiar, MD, FACS, Anthony J. Bauer, PhD, and David J. Tweardy, MD

Pseudomonas Aeruginosa Severely Perturbs the Permselectivity of Cultured Intestinal Epithelial Cells and Stimulates Interleukin-8 Release..... 80
Flavio Rocha, BS, Eric Stern, BS, Mark Musch, PhD, Eugene Chang, MD, Robert Laughlin, BA, and John Alverdy, MD, FACS

Interleukin-10 Production Is Preserved by Interleukin-12 Therapy That Restores Resistance to Infection After Injury..... 82
Andreas Goebel, MD, Eamon Kavanagh, MBBCH, Inna Saporoschetz, BS, Christopher Soberg, BS, James Lederer, PhD, John A. Mannick, MD, and Mary L. Rodrick, PhD

Cytokines Decrease FAS (CD95) Receptor Expression and Delay Polymorphonuclear Leukocyte Apoptosis in Normal and Septic Patients 84
Islam Shahin, BS, Christopher V. Keogh, BS, Steve E. Calvano, PhD, Simrat Randhawa, MD, Ashwini Kumar, BS, Edward Lin, DO, and Stephen F. Lowry, MD, FACS

Effect of Calcium Channel Blockade on Interleukin-1β Production in Lipopolysaccharide-Stimulated Monocytes..... 86
Theodore W. Uroskie, Jr., MD, Peter H. Blackmore, PhD, and L. D. Britt, MD, MPH

Increased Circulating Levels of Interleukin-18 During Severe Sepsis in Humans 88
Andreas Oberholzer, MD, Ursula Steckholzer, BS, Haruki Okamura, PhD, Masashi Kurimoto, PhD, Otmar Trentz, MD, and Wolfgang Ertel, MD

Interleukin-10 Prevents Loss of Vascular Tone of Isolated Rat Skeletal Muscle Arterioles Exposed to Endotoxin 90
Bethany B. Tan, MD, Russell L. Prewitt, PhD, and L. D. Britt, MD, MPH, FACS

Human Neutrophils Potentiate Interleukin-6 Signaling in the Early Postinjury Period by Shedding Soluble Interleukin-6 Receptor 92
Jeffrey L. Johnson, MD, Ernest E. Moore, MD, FACS, Douglas Y. Tamura, MD, Garret Zallen, MD, Walter L. Biffl, MD, and Christopher C. Silliman, MD, PhD

Shedding of Soluble Tumor Necrosis Factor Receptors Induced by Systemic Tumor Necrosis Factor Leakage Following Isolated Limb Perfusion in Cancer Patients: Its Relevance to Septic Shocklike Syndrome 95
Subhi Abu-Abid, MD, Dan Aderka, MD, Dina Lev-Chelouche, MD, Andrew P. Cope, MD, David Wallach, PhD, Mordechai Gutman, MD, and Joseph M. Klausner, MD

Interleukin-11 Upregulates Cytokine Expression 97
Mohamed R. Ali, Jr., MD, Jocelyn S. Hills, BSN, Makio Ogawa, MD, PhD, and André Hebra, MD

Chapter V—Cell Signaling

Postinjury Neutrophil Priming in Severely Injured Patients Is Mediated by p38 Mitogen-Activated Protein Kinase Activation 100
Garret Zallen, MD, Ernest E. Moore, MD, FACS, Douglas Y. Tamura, MD, Jeffrey L. Johnson, MD, Junichi Aiboshi, MD, Walter Biffl, MD, and Christopher C. Silliman, MD, PhD

Increased Organ Apoptosis Early After Burn Is Limited to Lymphoid Tissues and Is Tumor Necrosis Factor-α Independent 102
Kunitaro Fukuzuka, MD, Jason J. Rosenberg, MD, Gregory C. Gaines, MD, Zaher Abouhamze, Troy Auffenberg, BS, Cinthia L. Tannahill, BS, Sally L. D. MacKay, PhD, Lyle L. Moldawer, PhD, and David W. Mozingo, MD, FACS

Reduction in Neutrophil Interleukin-8 and C5a Receptors Following Transmigration and in Surgical Patients with Systemic Inflammatory Response Syndrome—Implications for the Regulation of Neutrophil Delivery to the Inflammatory Microenvironment 104
Andrew J. E. Seely, MD, Daniel E. Swartz, MD, and Nicolas V. Christou, MD, PhD, FRCSC, FACS

Acute Hypoxemia in Humans Enhances the Neutrophil Inflammatory Response 107
Douglas Y. Tamura, MD, Ernest E. Moore, MD, FACS, David A. Partrick, MD, Jeffrey L. Johnson, MD, Patrick J. Offner, MD, FACS, and Christopher C. Silliman, MD, PhD

Adherence Couples Lipopolysaccharide Membrane Binding to Macrophage Signal Transduction 109
Gregory J. Bauer, MD, Iris Garcia, BS, Sam Arbabi, MD, and Ronald V. Maier, MD, FACS

CXC Chemokine-Modulated Neutrophil Apoptosis: Implications in the Treatment of Acute Respiratory Distress Syndrome 111
Eric Kleinstein, MD, Elliot R. Goodman, MD, Andrea M. Fusco, MD, Dennis P. Quinlan, MD, Robert L. Lavery, BS, Carl J. Hauser, MD, FACS, Zoltan Fekete, MD, David H. Livingston, MD, FACS, and Edwin A. Deitch, MD, FACS

Heat Shock Inhibits Activation of the Inflammatory Transcription Factor NF-κB in Human Intestinal Epithelial Cells 112
Alexander A. Parikh, MD, M. Ryan Moon, MD, Josef E. Fischer, MD, FACS, Andrew L. Salzman, MD, and Per-Olof Hasselgren, MD, FACS

Inducible Nitric Oxide Synthase Inhibits Activation of NF-κB and STAT3 115
Raphael T. Villavicencio, MD, Bruce R. Pitt, PhD, Ray Ganster, PhD, Christian Hierholzer, MD, David J. Tweardy, MD, and Timothy R. Billiar, MD, FACS

Protein Calorie Malnutrition Attenuates NFκB Activation in Peritoneal Macrophages 117
Linda Barry, BA, Juan Mestre, MD, Martin McCarter, MD, Hassan Naama, FRSCI, Peter J. Mackrell, MD, David Rivadeneira, MD, Philip Stapleton, PhD, and John Daly, MD, FACS

Hypoxia Results in Delayed T-Cell Proliferation and Increased Nitric Oxide Production 119
Deborah Kozik, DO, Angela J. Sanson, MS, and Mark A. Malangoni, MD, FACS

Cytokine-Stimulated Human Inducible Nitric Oxide Synthase Gene Expression Is Mediated by Activity of Transcription Factors NF-κB and STAT1α 121
Bradley S. Taylor, MD, Raymond W. Ganster, PhD, Michael de Vera, MD, Timothy R. Billiar, MD, and David A. Geller, MD

Transgenic Expression of the Interleukin-1 Receptor on T Cells Alters T-Cell Activation and Differentiation 122
Christopher C. Soberg, BS, John A. Mannick, MD, and James A. Lederer, MS, PhD

Chapter VI—Alimentary Tract

Thyroid Hormone and Gut Differentiation: Molecular Mechanisms of Action ... 126
Shufen Meng, MD, Sonia Archer, MD, and Richard A. Hodin, MD, FACS

β1 Integrins Are Required for Basement Membrane–Induced Glandular Morphogenesis of an Intestinal Epithelial Cell Line 127
Xihong Zhang, MD, John W. Cromwell, MD, and Julio Garcia-Aguilar, MD, PhD

Differentiation Decreases Enterocyte Adhesion and Integrin Expression: A Mechanism of Villus Tip Release 130
Molly M. Buzdon, MD, Lena M. Napolitano, MD, FACS, Jian Y. Wang, PhD, Steve Summers, MD, PhD, and Barbara L. Bass, MD, FACS

Glucagonlike Peptide-2 Stimulates Intestinal Epithelial Cell Cycle Progression in Vitro 131
Jasleen Jasleen, MD, MS, Peter B. Severy, BS, Danny O. Jacobs, MD, MPH, FACS, Michael J. Zinner, MD, FACS, and Stanley W. Ashley, MD, FACS

Monochloramine Activates Calcium-Independent Outward Currents in Colonic Smooth Muscle 133
Madhu Prasad, MD, Hamid I. Akbarali, PhD, and Jeffrey B. Matthews, MD, FACS

Epidermal Growth Factor–Induced Store-Operated Calcium Influx Is Mediated by Endogenous Prostaglandins in Human Colonic Carcinoma Cells 134
Evan R. Kokoska, MD, Gregory S. Smith, PhD, Yashwant Deshpande, MS, and Thomas A. Miller, MD, FACS

An Intact F-Actin Cytoskeleton Is Required for Ca^{2+}-Dependent Receptor-Mediated Signal Transduction in Cl^- Secretory Epithelial Cells 136
Timothy C. O'Brien, MD, Edward C. Mun, MD, Jaekyung C. Song, BA, and Jeffrey B. Matthews, MD, FACS

Butyrate Stimulation of Alkaline Phosphatase, but Not Dipeptidyl Dipeptidase, Is Tyrosine Kinase–Dependent 137
Marc D. Basson, MD, PhD, FACS, and Fu Hong, MD, PhD

Region-Specific Changes in Levels of mRNAs Encoding Na^+/H^+ Exchangers in Intestinal Mucosa After Distal Ileal Diversion..... 139
Robert R. Cima, MD, Jennifer Purdy, MD, Marc A. Doble, BA, Michael J. Zinner, MD, FACS, and David I. Soybel, MD, FACS

Tumorigenesis at the Squamocolumnar Junction in an E1A/E1B Transgenic Model of Esophagogastric Adenocarcinoma..... 141
Mark D. Duncan, MD, David M. Donovan, PhD, Quy H. Phung, Tarik Tihan, MD, PhD, John W. Harmon, MD, FACS, Patricia J. Gearhart, PhD, and Kimberly L. K. Duncan, PhD

Presymptomatic Diagnosis of Gene Carriers in Familial Juvenile Polyposis 142
James R. Howe, MD, John C. Ringold, Frank A. Mitros, MD, and Robert W. Summers, MD

Laminin in the Developing Pancreas: Implications for Exocrine and Endocrine Pancreatic Differentiation..... 144
Gary D. Breslow, BA, Christopher A. Crisera, MD, Michael I. Rose, MD, Patrick R. Connelly, MS, Min Li, MS, Kari L. Colen, BA, Michael T. Longaker, MD, and George K. Gittes, MD

Altered Insulin Receptor and Insulin Signaling Proteins in Chronic Pancreatitis..... 147
Seth A. Spector, MD, Eric T. Olson, BA, Lori A. Slezak, MD, Jin Ping Wang, MD, Dana K. Andersen, MD, FACS, and Neal E. Seymour, MD, FACS

Alterations in Insulin Receptor and Insulin Receptor Substrate–1 Phosphorylation Following Major Hepatectomy 149
Carolyn E. Jones, MD, Leah L. Wendell, BA, Sonali S. Patel, BS, and David A. Krusch, MD, FACS

Impaired Hepatocyte Insulin Receptor Internalization in Chronic Pancreatitis.... 152
Lori A. Slezak, MD, Jamie D. Nathan, BS, Peter D. Zdankiewicz, MD, Seth A. Spector, MD, Jin Ping Wang, MD, Bhanu P. Jena, PhD, John P. Geibel, MD, DSc, Neal E. Seymour, MD, FACS, and Dana K. Andersen, MD, FACS

Intrapancreatic Neurons Regulate Exocrine Secretion and *c-fos* Transcription.... 153
Douglas J. Turner, MD, Gail Romanchuk, MS, Katherine Leach, BS, and Michael W. Mulholland, MD, PhD, FACS

The Expression of Angiogenesis-Regulating Genes by Human Pancreatic Carcinoma Cells Correlates with Metastatic Potential 155
Christiane J. Bruns, MD, Matthew T. Harbison, BA, Ines Eue, PhD, and Isaiah J. Fidler, DVM, PhD

Activity of Proliferation-Associated and Liver-Enriched Transcription Factors in Rats with Surgically Induced Liver Failure 157
Yukio Kamohara, MD, Helene Lilja, MD, Toomas Neuman, PhD, Achilles A. Demetriou, MD, PhD, FACS, and Jacek Rozga, MD, PhD

Stimulation of the JNK Signaling Pathway by the Gut Hormone Neurotensin Acting Through Its High-Affinity Receptor 159
Richard A. Ehlers, MD, and B. Mark Evers, MD, FACS

TNF p55, but Not FAS CD95, Receptor Mediates Acinar Cell Apoptosis During Acute Pancreatitis 160
Daphne Denham, MD, Woody Denham, MD, Jun Yang, MD, Gay Carter, and James Norman, MD, FACS

Intestinal Adaptation After Massive Small-Bowel Resection Increases Enterocyte Apoptosis via a p53-Independent Mechanism 163
Cathy E. Shin, MD, Richard A. Falcone, Jr., MD, Christopher J. Kemp, BS, Christopher R. Erwin, PhD, and Brad W. Warner, MD, FACS

Glutamine Deprivation Decreases Glutathione Levels in Intestinal Epithelial Cells 164
Harry T. Papaconstantinou, MD, Istvan Boldogh, PhD, Mark R. Hellmich, PhD, Courtney M. Townsend, Jr., MD, FACS, and Tien C. Ko, MD, FACS

Amino Acid Transport After Massive Enterectomy Is Dependent on the Site of Resection 166
Howard T. Wang, MD, Jen-nie H. Miller, MS, Nelly Avissar, PhD, and Harry C. Sax, MD, FACS

Increased Activity of Inducible Nitric Oxide Synthase After Bile Duct Ligation in the Rat Is Independent of Cyclooxygenase-2 Activity 168
Mimi Leong, MD, Jennifer A. Wargo, MD, Elizabeth P. Blankenhorn, PhD, Donna M. Murasko, PhD, and Kim U. Kahng, MD, FACS

TNF-α Blockade Decreases Septic Mortality in Obstructive Jaundice 171
Peter J. Allen, MD, Michael D'Angelica, MD, Christine Hodyl, DO, Yong-Jia You, MS, and Yuman Fong, MD

Bilirubin Causes Increased Macrophage TNF-α Production and Potentiates Endotoxin-Induced TNF-α Production 173
Stephen O'Neil, MD, Richard Gamelli, MD, FACS, and Ravi Shankar, PhD

Expression of the Na^+/Ca^{2+} Exchanger Is Upregulated Prior to Gallstone Formation in Humans 174
A. James Moser, MD, Kenneth Morgenstern, MD, Zahidur R. Abedin, BS, Peter Smith, PhD, Mohammad Z. Abedin, PhD, and Joel J. Roslyn, MD, FACS

Transforming Growth Factor β1 Maintains Expression of Liver-Enriched Transcription Factors in Mitogen-Stimulated Primary Rat Hepatocyte Cultures 176
Helene Lilja, MD, Yukio Kamohara, MD, Toomas Neuman, PhD, Achilles A. Demetriou, MD, PhD, FACS, and Jacek Rozga, MD, PhD

The Scientific Basis for Early Peritoneal Lavage in the Management of Severe Necrotizing Pancreatitis: A Study of Hepatocellular Injury 178
Hung S. Ho, MD, and Takashi Ueda, MD, PhD

Protective Effects of Interleukin-10 Against Hepatic Ischemia/Reperfusion Injury in Mice 180
Hiroyuki Yoshidome, MD, Alex B. Lentsch, PhD, William G. Cheadle, MD, FACS, Frederick N. Miller, PhD, and Michael J. Edwards, MD, FACS

Hindlimb Ischemia-Reperfusion Impairs Hepatocellular Energetics and Function via the Complement System 181
Michael S. Wong, MD, Malcolm K. Robinson, MD, Tirso M. Lara, MD, Elizabeth A. Chambers, MS, Douglas W. Wilmore, MD, FACS, Lester Kobzik, MD, and Danny O. Jacobs, MD, MPH, FACS

Anti-Fas Antibody Induces Hepatic Microvascular Perfusion Failure and Decreases Kupffer Cell Clearance Capacity 184
Guido A. Wanner, MD, Ladislav Mica, BS, Otmar Trentz, MD, and Wolfgang Ertel, MD

Inducible Nitric Oxide Synthase Mediates Smooth Muscle Dysfunction in Rodents After Abdominal Surgical Manipulation 186
Jörg C. Kalff, MD, Mark K. Eskandari, MD, Christian Hierholzer, MD, Wolfgang H. Schraut, MD, FACS, Timothy R. Billiar, MD, FACS, Richard L. Simmons, MD, FACS, and Anthony J. Bauer, PhD

Modulation of Intestinal Inflammation by Berberine 187
Brian McNamara, MD, Desmond C. Winter, MD, Cormac T. Taylor, PhD, Noel F. Fanning, FRCSI, H. Paul Redmond, MCh, FRCSI, Alan W. Baird, PhD, Gerald C. O'Sullivan, MCh, FRCSI, and Brian J. Harvey, PhD, DSc

CD1d Expression Increases Cellular Susceptibility to Lysis by Peripheral Blood Lymphocytes 189
Michael J. Page, MD, Anna F. Tilberg, MS, Michael J. Chorney, PhD, and Walter A. Koltun, MD, FACS

Chapter VII—Cardiothoracic

Hyperpolarized Arrest with Pinacidil Is Superior to Traditional St. Thomas' Solution in the Intact Animal 192
A. Mark Jayawant, MD, Edward R. Stephenson, Jr., MD, Gregory S. Matte, BS, George A. Prophet, BS, Kathryn F. LaNoue, PhD, James W. Griffith, DVM, and Ralph J. Damiano, Jr., MD

The Opioid Agonist Dadle Does Not Attenuate Myocardial Stunning 194
Juan A. Sanchez, MD, FACS, M. Salik Jahania, MD, Robert D. Lasley, PhD, Prakash Narayan, PhD, and Robert M. Mentzer, Jr., MD, FACS

δ Opioid Receptor–Induced Myocardial Protection 196
Anthony J. Georges, MD, Charles F. Schwartz, MD, Ken S. Kilgore, PhD, Marsha A. Gallagher, and Steven F. Bolling, MD, FACS

Bradykinin Release from the Ischemic Heart and Its Role in Myocardial Preservation 198
Motoaki Sato, MD, Richard M. Engelman, MD, FACS, John A. Rousou, MD, FACS, Joseph E. Flack III, MD, FACS, David W. Deaton, MD, FACS, Gerald A. Cordis, MS, Nilanjana Maulik, PhD, and Dipak K. Das, PhD

Nitric Oxide Prevents Peroxide-Dependent Endothelial Cell Toxicity by Regulating Lipid Peroxidation Monitored by Chemiluminescence 200
James Ku, MD, and Don K. Nakayama, MD, FACS

Nitric Oxide Is a Requisite Cofactor to Generate Adenosine Triphosphate–Sensitive, Potassium Channel–Mediated Preconditioning 202
Hitoshi Horimoto, MD, Glenn R. Gaudette, MSME, and Irvin B. Krukenkamp, MD, FACS

Adenosine Bolus–Enhanced Ischemic Preconditioning Is as Effective as Cold-Blood Cardioplegia in Decreasing Infarct Size and Enhancing Postischemic Functional Recovery in the Global Ischemic Sheep Heart 204
Masahisa Uematsu, MD, James D. McCully, PhD, and Sidney Levitsky, MD, FACS

Ischemic Preconditioning Does Not Attenuate Porcine Myocardial Stunning Assessed by Load-Insensitive Measurements of Contractility 205
M. Salik Jahania, MD, Robert D. Lasley, PhD, Juan Sanchez, MD, Prakash Narayan, PhD, and Robert M. Mentzer, Jr., MD, FACS

Pretreatment with a Specific Adenosine A_3 Receptor Agonist Before Cardioplegia Arrest Improves Postischemic Function of Jeopardized Myocardium 207
Vinod H. Thourani, MD, Russell S. Ronson, MD, James E. Jordan, BS, Zhi-Qing Zhao, MD, PhD, Masanori Nakamura, MD, PhD, Robert A. Guyton, MD, and Jakob Vinten-Johansen, PhD

Ischemic Preconditioning Suppresses Apoptosis by Upregulating the Antideath Gene *bcl-2* *209*
Nilanjana Maulik, PhD, Richard M. Engelman, MD, FACS, John A. Rousou, MD, FACS, Joseph E. Flack III, MD, FACS, David W. Deaton, MD, FACS, and Dipak K. Das, PhD

Therapeutic L-Type Ca^{2+} Channel Blockade Prevents Ischemic Preconditioning of Human Myocardium 212
Brian S. Cain, MD, Daniel R. Meldrum, MD, Xianzhong Meng, MD, Brian D. Shames, MD, Anirban Banerjee, PhD, and Alden H. Harken, MD, FACS

Protection of the Heart Undergoing Minimally Invasive Surgery: When Is Ischemic Preconditioning Detrimental or Beneficial? 214
Glenn R. Gaudette, MSME, Hitoshi Horimoto, MD, and Irvin B. Krukenkamp, MD, FACS

Prolonged Transgene Expression in the Rat Myocardium Mediated by an Adeno-Associated Viral Vector: Implications for Chronic Cardiac Therapy 215
Leonard Y. Lee, MD, Xiaohuai Zhou, PhD, Shailen R. Patel, MD, Dean R. Polce, BS, O. Wayne Isom, MD, Ronald G. Crystal, MD, and Todd K. Rosengart, MD

Adenovirus-Mediated Gene Transfer of Catalase Preserves Regional Myocardial Function from Ischemic Reperfusion Injury in Rabbits 217
Henry L. Zhu, MD, Matthew D. Taylor, BS, C. Vijayasarathy, PhD, Janet C. L. Zhang, MD, Y. Joseph Woo, MD, H. Lee Sweeney, PhD, and Timothy J. Gardner, MD, FACS

Evidence of Collateral Development After Intramyocardial Gene Therapy with Vascular Endothelial Growth Factor 220
Rene A. Tio, MD, Tengis Tkebuchava, MD, Corinna Lebherz, Thomas Scheuermann, BS, Meredith Magner, BS, Jeffrey M. Isner, MD, and James F. Symes, MD, FACS

Adenovirus-Mediated Angiogenic Therapy Produces Minimal Inflammation and No Functional Compromise After Direct Myocardial Injection: Implications for Clinical Use 221
Shailen R. Patel, MD, Leonard Y. Lee, MD, Dean R. Polce, BS, Eric A. Schwarz, MD, Rebecca T. Hahn, MD, Erica Jones, MD, Richard B. Devereux, MD, Neil Hackett, PhD, O. Wayne Isom, MD, Ronald G. Crystal, MD, and Todd K. Rosengart, MD

Endotoxin-Induced Apoptosis in Rat Cardiomyocytes Is Mediated by Nitric Oxide and Attenuated by Heat Shock 223
Faiz Y. Bhora, MD, Robert M. Wise, MS, Joseph G. Bussey III, MD, Joseph S. McLaughlin, MD, FACS, and Andrew H. Foster, MD, FACS

Protein Kinase C Isoform Gene Expression in the Globally Stunned Myocardium 225
Kourosh Baghelai, MD, Ralph Marktanner, MD, James D. Crandall, MS, Jason Cillo, BA, Laura J. Graham, BS, Emma R. Jakoi, PhD, and Andrew S. Wechsler, MD, FACS

8-Bromo Cyclic Guanosine Monophosphate Improves Coronary Flow During Reperfusion without Depression of Left Ventricular Developed Pressure 227
Patrick E. Parrino, MD, Irving L. Kron, MD, FACS, Scott D. Ross, MD, Kimberly S. Shockey, MS, Victor E. Laubach, PhD, Adam M. Kron, and Curtis G. Tribble, MD, FACS

Role of Tissue Factor in Myocardial Ischemia/Reperfusion Injury 229
Edward M. Boyle, MD, Jonathan H. Erlich, MD, PhD, Richard A. Santucci, MD, J. Craig Kovacich, BS, Colleen Fearns, PhD, Elizabeth N. Morgan, MD, Timothy G. Canty, Jr., MD, Wang Yun, MD, Timothy Pohlman, MD, FACS, Edward D. Verrier, MD, FACS, and Nigel Mackman, PhD

Myocardial Ischemia Before Reperfusion Activates Cardiocyte Nuclear Factor Kappa B and Induces Production of Tumor Necrosis Factor Alpha 231
Brian D. Shames, MD, Xianzhong Meng, MD, Hazel Barton, PhD, Daniel R. Meldrum, MD, Edward J. Pulido, MD, Brian S. Cain, MD, Anirban Banerjee, PhD, and Alden H. Harken, MD, FACS

Platelet-Activating Factor Acetylhydrolase Prevents Myocardial Ischemia/Reperfusion Injury 233
Elizabeth N. Morgan, MD, Edward M. Boyle, Jr., MD, Wang Yun, MD, Timothy G. Canty, Jr., MD, Timothy H. Pohlman, MD, and Edward D. Verrier, MD

Total Complement Inhibition: An Effective Strategy to Limit Ischemic Injury During Revascularization 236
Yusheng Bao, MD, Jennifer Gaudiani, BA, Samuel Rivers, BS, and Harold L. Lazar, MD, FACS

Bioenergetic Effects of Acute Administration of Liposomal Coenzyme Q10 on Myocardial Ischemia/Reperfusion Injury 237
Koki Niibori, MD, Krzysztof P. Wroblewski, PhD, Hitoshi Yokoyama, MD, PhD, Juan A. Crestanello, MD, and Glenn J. Whitman, MD, FACS

Hemodynamic Effects of the Cardiosupport System in a Canine Model of Acute Ischemic Heart Failure 238
John H. Artrip, MD, Mehmet C. Oz, MD, FACS, Windsor Ting, MD, FACS, Geng-Hua Yi, MD, Niloo M. Edwards, MD, FACS, Daniel Burkhoff, MD, PhD, and Jie Wang, MD, PhD

Impact of Beat-to-Beat Skeletal Muscle Assistance on Chronic Left Ventricular Function in Dynamic Cardiomyoplasty 241
Himanshu J. Patel, MD, James J. Pilla, PhD, Sorin V. Pusca, MD, Aaron S. Blom, BS, Edward B. Lankford, MD, PhD, and Michael A. Acker, MD, FACS

Magnetic Resonance Imaging–Radiofrequency Tissue Tagging in Patients with Ischemic Cardiomyopathy: Quantitative Dobutamine Left Ventricular Myocardial Stress, Strain, and Work Analysis 243
Pavlos Moustakidis, MD, Brian P. Cupps, PhD, Michael J. Moulton, MD, Andrew M. Kates, MD, Robert J. Gropler, MD, Michael K. Pasque, MD, and Thoralf M. Sundt III, MD

Left Ventricular Function in a Porcine Model of Dilated Cardiomyopathy During Left Ventricular Reduction Surgery 246
Joseph P. Hart, MD, Santos E. Cabreriza, BA, Chao-Xiang Jia, MD, Juan P. Umana, MD, Daniel J. Goldstein, MD, Allison Hill-Edgar, BA, Alan D. Weinberg, MS, Mark E. Galantowicz, MD, Marc L. Dickstein, MD, Dan Burkhoff, MD, PhD, Eric A. Rose, MD, FACS, and Henry M. Spotnitz, MD, FACS

Endothelin Influences Contractility in Normal Human Left Ventricular Myocytes 248
R. Brent New, MD, James L. Zellner, MD, Jeffrey S. Mandel, MD, Angela C. Sampson, BA, Jennifer W. Hendrick, BS, James H. McElmurray, BS, Fred A. Crawford, Jr., MD, FACS, and Francis G. Spinale, MD, PhD

Protecting the Brain During Cardiopulmonary Bypass: The Continuing Merits of Hypothermia 250
Victor B. Kim, MD, Philip M. Brown, Jr., MD, Jonathan M. Philpott, MD, You Su Sun, MD, Robert M. Lust, PhD, and W. Randolph Chitwood, Jr., MD, FACS

Hemoglobin-Based Oxygen-Carrying Solutions in Cardiac Surgery: Effects on Reperfusion of Ischemic Myocardium 253
Hiroaki Tanabe, MD, Paul J. LaRaia, MD, J. Luis Guerrero, BS, Lori Nicholls, BS, and Gus J. Vlahakes, MD

Effect of Hypothermia on Cerebral Blood Flow and Metabolism in the Pig..... 256
Marek P. Ehrlich, MD, Jock McCullough, MD, Tatu Juvonen, MD, PhD, Ning Zhang, MD, Donald Weisz, PhD, Carol Bodian, DrPH, and Randall B. Griepp, MD

Altered Microvascular Regulation by Acute Myocardial Ischemia..... 258
Caroline Metais, MD, Jianyi Li, MB, MS, J. Michael Haering, MD, William E. Cohn, MD, Michael Simons, MD, and Frank W. Sellke, MD, FACS

A New Treatment for Acute Experimental Coronary Artery Occlusion: Left Ventricle–Powered Coronary Sinus Retroperfusion 260
Jeffrey S. Martin, MD, John G. Byrne, MD, Olivier Ghez, MD, Umer Sayeed-Shah, MD, Sergey Grachev, MD, Rita Laurence, BS, and Lawrence H. Cohn, MD, FACS

Initial Experience with Robotically Assisted Endoscopic Coronary Artery Bypass Grafting 263
Edward R. Stephenson, Jr., MD, Sachin Sankholkar, MS, Christopher T. Ducko, MD, and Ralph J. Damiano, Jr., MD, FACS

Variable Effects of Immune Suppression on the Efficacy of Gene Therapy for Malignant Mesothelioma Using Herpes Simplex Virus Thymidine Kinase/Ganciclovir 265
Michael Y. Chang, MD, Claude El Kouri, MD, Ashraf Elshami, MD, Michael Lanuti, MD, Seth Force, MD, Nabil Rizk, MD, Laura Coonrod, MD, Kunjilata Amin, PhD, Steven M. Albelda, MD, and Larry R. Kaiser, MD, FACS

Changes in Pulmonary Physiology After Lung Volume Reduction Surgery in Rabbits with Mild Versus Moderate Emphysema 266
Ledford L. Powell, MD, Dan L. Serna, MD, Matthew Brenner, MD, Rayhan Jalal, Mark Gaon, BS, Tanya Burney, BA, Jill Monti-Frayne, BA, Robert McKenna, MD, and John C. Chen, MD

Interleukin-4 Receptor Expression Marks Malignant Behavior of Human Pleural Tumors 269
Junaid Khan, MD, Wui Xia, MD, Fred Varricchio, PhD, Raj Puri, MD, PhD, and David M. Jablons, MD, FACS

Evaluation of an E1/E4-Deleted Adenovirus Expressing the Herpes Simplex Thymidine Kinase Suicide Gene in Cancer Gene Therapy 270
Michael Lanuti, MD, Guang-Ping Gao, PhD, Seth D. Force, MD, Michael Y. Chang, MD, Kunjilata Amin, PhD, Joseph P. Hughes, PhD, James M. Wilson, MD, PhD, Steven M. Albelda, MD, and Larry R. Kaiser, MD

Comparison of Nissen Fundoplication and Gastroesophageal Valvuloplasty in an Experimental Model of Gastroesophageal Reflux Disease 271
Farid Gharagozloo, MD, FACS, Mohammad Pourshahmir, MD, Karen Deters, MD, Stanley B. Benjamin, MD, and James L. Cox, MD, FACS

Amelioration of Ischemia/Reperfusion Injury in an Isolated Rabbit Lung Model Using 2-Ethy-2,5,5-Trimethyl-3-Oxazolidine 273
Nahidh W. Hasaniya, MD, PhD, Aziz M. Razzuk, MD, Shyamal Premaratne, MD, PhD, Wei Zhang, MD, Ayman Abdul-Ghani, MD, Milea Siera, BS, Roderick H. Dashwood, PhD, Bo Eklof, MD, PhD, and J. Judson McNamara, MD, FACC, FACS

Leukocyte Depletion Improves Lung Reperfusion Injury After Transplantation ... 275
Scott D. Ross, MD, Curtis G. Tribble, MD, FACS, John R. Gaughen, Jr., BA, Kimberly S. Shockey, MS, Victor E. Laubach, PhD, Patrick E. Parrino, MD, and Irving L. Kron, MD, FACS

Exhaled Nitric Oxide Is a Sensitive and Specific Measure of Acute Lung Transplant Rejection 276
Bassem N. Mora, MD, Timothy J. McCarthy, PhD, Michael J. Welch, PhD, Joel D. Cooper, MD, FACS, and G. Alexander Patterson, MD, FACS

Adenovirus-Mediated Overexpression of the Beta-Adrenergic Receptor Kinase Inhibitor in a Model of Cardiac Transplantation 278
Ashish S. Shah, MD, Jonathan A. Hata, BA, Alan P. Kypson, MD, Donald D. Glower, MD, and Walter J. Koch, PhD

Tolerance to Vascularized Murine Cardiac Xenografts in Xenochimeric B10.BR Mice → Lewis Rats: Establishment of Mouse → Rat Chimeras 280
Muhammad M. Mohiuddin, MD, Suzanne T. Ildstad, MD, FACS, and Verdi J. DiSesa, MD, FACS

Pressure-Mediated ex Vivo Oligonucleotide Transfection of Intact Rat Hearts: A Highly Efficient Method for Genetic Engineering of Cardiac Transplants 282
Michael J. Mann, MD, Lunan Zhang, MD, and Victor J. Dzau, MD

Attenuation of Cardiac Allograft Vasculopathy by Adenoviral Gene Transfer of Inducible Nitric Oxide Synthase 283
Alan D. Murdock, MD, Sen Li, MD, Yoshika Kurimoto, MD, Anthony Demetris, MD, Timothy Billiar, MD, FACS, Imre Kovesdi, PhD, Alena Lizonova, PhD, and Si Pham, MD, FACS

Chapter VIII—Vascular

Balloon Angioplasty Induces Heat Shock Protein 70 in Human Blood Vessels.. 285
Lemuel B. Kirby, MD, and Colleen M. Brophy, MD, FACS

Cyclic Stretch of Pulmonary Arterial Endothelial Cells Activates Different Mitogen-Activated Protein Kinase Subtypes 287
Hiroyuki Kito, MD, Emery L. Chen, BA, Ira Mills, PhD, Masataka Ikeda, MD, and Bauer E. Sumpio, MD, PhD

Effect of Nitric Oxide on Tissue Factor Expression by Vascular Tissue: Studies in Cell Culture and with Perfused Vein Segments 288
Satish C. Muluk, MD, Melina R. Kibbe, MD, Susan L. Gleixner, BS, David A. Vorp, PhD, and Timothy R. Billiar, MD, FACS

Smoking and Shear Stress–Induced Endothelial Cell Anoikis May Be Prevented by the Amino Acid Taurine 290
Fiona Fennessy, MB, Jiang Huai Wang, MD, PhD, Cathal Kelly, FRCSI, and David Bouchier-Hayes, FRCSI

Human Saphenous Vein Endothelial Cell Platelet–Derived Growth Factor Synthesis in Response to Oxygen Tension and Shear Stress: In Vitro Venous Arterialization 292
Charles F. Bratton, MD, Hassan Al-Badawi, MD, Brian G. Peterson, BS, Hiroko Kadowaki, PhD, George M. Patton, PhD, and Michael T. Watkins, MD, FACS

Extracellular Matrix Proteins Enhance the Adhesion and NF-κB Activation of Endothelial Cells Subject to Shear Stress 294
Andrew S. Lee, BS, Owen Lawrence, PhD, Marta Scatena, PhD, Cecilia Giachelli, PhD, Richard P. Cochran, MD, FACS, and Karyn S. Kunzelman, PhD

Arterial Adaptation to Increased Flow Requires Transforming Growth Factor β_1 296
Tej M. Singh, MD, Keith Y. Abe, BS, Yong-Jie Zhuang, MD, PhD, Hirotake Masuda, MD, PhD, and Christopher K. Zarins, MD, FACS

Endothelial Cell Exposure to Shear Stress Changes the Matrix Metalloproteinase Activity of Cocultured Smooth Muscle Cells in a Novel Flow Model 298
Gary B. Nackman, MD, Todd Stefan, MD, Ildiko Enteresz, Tim Wei, PhD, and Alan M. Graham, MD, FACS

Matrix Metalloproteinase-9 Overexpression Alters Remodeling After Injury in the Rat Carotid Artery 300
David P. Mason, MD, Richard D. Kenagy, PhD, David Hasenstab, BS, Daniel F. Bowen-Pope, PhD, Ronald A. Seifert, PhD, Scott Coats, BA, Suzanne M. Hawkins, BA, and Alexander W. Clowes, MD

Messenger RNA for Tissue Inhibitor of Metalloproteinase-1 Is Actively Transcribed in Early Experimental Vein Grafts 302
Jeffery B. Dattilo, MD, Charles E. Fields, MD, Kourosh Baghelai, MD, Mary Peace M. Dattilo, BS, Dorne R. Yager, PhD, and Raymond G. Makhoul, MD, FACS

Neointimal Hyperplasia After Femoral Artery Transluminal Injury in C57BL/6 and FVB Mice 303
Ernane D. Reis, MD, Merce Roque, MD, Wen X. Zhang, MD, John T. Fallon, MD, PhD, Hubert Weinberg, MD, Juan J. Badimon, PhD, and Mark B. Taubman, MD

Chlamydia Pneumoniae Stimulates Human Vascular Smooth Muscle Proliferation 305
Craig H. Selzman, MD, Adriana Weinberg, MD, Stephanie A. Miller, MD, Mihai G. Netea, MD, Patty Young, BS, Alden H. Harken, MD, and Charles A. Dinarello, MD

The Proliferative Effects of Insulin and Glucose on Human Infragenicular Vascular Smooth Muscle Cells Are Mediated by Insulin-Like Growth Factor 1 Receptors, Not Insulin Receptors 307
Marc E. Mitchell, MD, FACS, Ricardo Avena, MD, Richard F. Neville, MD, FACS, and Anton N. Sidawy, MD, FACS

Signaling Pathways by Which Thrombospondin-1 Promotes Vascular Smooth Muscle Cell Proliferation and Chemotaxis 309
Vivian Gahtan, MD, FACS, Xiujie Wang, MD, George P. Tuszynski, PhD, Vicki L. Rothman, and Bauer E. Sumpio, MD, PhD, FACS

Distinct Signaling Pathways Mediate Extracellular Matrix Protein Versus Platelet-Derived Growth Factor–Induced Smooth Muscle Cell Migration 311
Hiroyuki Itoh, MD, Peter R. Nelson, MD, Terry L. Kaiura, BS, and K. Craig Kent, MD, FACS

Adenosine Protects Against Thrombin-Induced Permeability Increases in Huvec Monolayer 313
Beverly A. Laureano, MD, Thomas E. Dahms, PhD, and Thomas A. Miller, MD, FACS

Ovarian Ablation Alone Induces Atherosclerosis and the Accumulation of Fibroblast Growth Factor That Are Inhibited with Estrogen Replacement 316
Thomas A. Whitehill, MD, Stephanie A. Miller, MD, A. S. Turner, BVSc, Jamie S. Gaynor, DVM, Alden H. Harken, MD, and Craig H. Selzman, MD

The Role of Vascular Endothelial Growth Factor in Vein Graft Stenosis Carotid and Aortic Atherosclerotic Disease 318
Aphrodite M. Henderson, MD, and Glenn C. Hunter, MD, FACS

Biologic Significance of Vascular Endothelial Growth Factor Modulation Following Experimental Bypass Grafting 320
Tam T. T. Huynh, MD, FRCSC, Mark G. Davies, MD, PhD, FRSCI, Brian H. Annex, MD, Kevin G. Peters, MD, Michael A. Thompson, and P-O. Hagen, PhD

Characterization of Covalently Bound Vascular Endothelial Growth Factor: Creation of a Novel Dacron Prosthetic Graft Surface 322
Stephen M. Kubaska III, MD, Matthew D. Phaneuf, BS, Susan L. Rook, BS, Lloyd P. Aiello, MD, PhD, Frank W. LoGerfo, MD, FACS, and William C. Quist, MD, PhD

Lipid Oxidation Products in Implanted Vascular Grafts 324
John A. van Aalst, MD, Paul L. Fox, PhD, and Linda M. Graham, MD

Adhesion to Expanded Polytetrafluoroethylene and Dacron Induces Neutrophil Death 326
Carolyn De La Cruz, MD, Beatrice Haimovich, PhD, and Ralph S. Greco, MD, FACS

Molecular Regulation of Chronic Venous Insufficiency Involves Increased Transforming Growth Factor β_1 Gene Expression and Protein Production 329
Raghuram Gorti, MD, Peter J. Pappas, MD, Nikhil Kansal, MD, Atsushi Seyama, MD, Frank T. Padberg, Jr., MD, FACS, Michael B. Silva, Jr., MD, Robert W. Hobson II, MD, FACS, and Walter N. Durán, MD, PhD

Chronic Venous Insufficiency Is Associated with Increased Systemic Platelet-Monocyte Aggregation 330
Craig C. Powell, MD, Marc R. Barnard, MS, Brian D. Peyton, MD, Michael J. Rohrer, MD, and Alan D. Michelson, MD

A Novel Anticoagulant Strategy in Peripheral Vascular Surgery That Decreases Operative Blood Loss 333
Talia B. Spanier, MD, Mehmet C. Oz, MD, David M. Stern, MD, Eric A. Rose, MD, Ann Marie Schmidt, MD, and Roman Nowygrod, MD

Orally Administered Heparin with a Carrier Agent Is Therapeutic for Deep Venous Thrombosis Treatment 335
Mark D. Gonze, MD, Kathleen L. Gonze, BS, C. Louis Garrard, MD, W. Charles Sternbergh III, MD, and Samuel R. Money, MD, FACS

Anti–KC/GRO Inhibits Lung Injury After Visceral Ischemia and Reperfusion .. 337
Timur P. Sarac, MD, James M. Seeger, MD, FACS, Douglas R. Call, PhD, Daniel G. Remick, MD, Lyle L. Moldawer, PhD, and Thomas S. Huber, MD, PhD, FACS

Cholesterol Increases Vein Graft Intimal Hyperplasia by Differential Modulation of Transforming Growth Factor β Gene Expression 339
Charles E. Fields, MD, Jeffery B. Dattilo, MD, Mary Peace M. Dattilo, BS, Dorne R. Yager, PhD, and Raymond G. Makhoul, MD, FACS

Self-Reactive Immunoglobulin M from Peritoneal B Cells Mediates Murine Intestinal Ischemia-Reperfusion Injury 341
W. G. Austen, Jr., MD, S. A. A. Woodcock, MD, Andrey Prodeus, MD, Russell Reid, Taine Pechet, MD, Francis D. Moore, Jr., MD, FACS, Les Kobzik, MD, Herbert Hechtman, MD, FACS, and Michael C. Carroll, PhD

Quenching of Reactive Oxygen Species Prevents Endothelial Permeability Changes During Hypoxia..... 343
Scott A. Schlidt, MD, Mir H. Ali, BA, Navdeep S. Chandel, PhD, Karen L. Hynes, BS, Paul T. Schumacker, PhD, and Bruce L. Gewertz, MD, FACS

Tumor Necrosis Factor α and Muscle Injury After Hind Limb Ischemia-Reperfusion in the Rat 344
Gregory C. Gaines, MD, M. Burress Welborn, MD, Jason J. Rosenberg, MS, MD, Kunitaro Fukuzuka, MD, Michael W. Taylor, MD, Lyle L. Moldawer, PhD, Thomas S. Huber, MD, PhD, FACS, and James Seeger, MD, FACS

A Specific Apoptosis Inhibitor Improves Intestinal Viability Following Ischemia-Reperfusion 347
Alik Farber, MD, John P. Connors, MD, Robert J. Wagner, BS, Jack L. Cronenwett, MD, FACS, and Richard J. Powell, MD

The Fibroblast Growth Factor 1 Mutant S130K Induces Heparin-Independent Smooth Muscle Cell Proliferation and Is Resistant to Thrombin Degradation in Fibrin Glue 348
Paula K. Shireman, MD, Brian Hampton, PhD, Wilson Burgess, PhD, and Howard P. Greisler, MD, FACS

Retroviral Transduction and G418 Selection Results in a Reversible Matrix Adhesion Defect Observed in Multiple Vascular Cell Types..... 351
David C. Cassada, MD, Michael B. Freeman, MD, A. Adam Roth, BS, Tonya T. Reddick, MS, Scott L. Stevens, MD, and Mitchell H. Goldman, MD

Chapter IX—Transplantation

In Utero Hematopoietic Stem Cell Transplantation Induces Donor-Specific Tolerance by a Combination of Clonal Deletion and Clonal Anergy 353
Heung Bae Kim, MD, Aimen F. Shaaban, MD, Ross Milner, MD, Christian Fichter, BA, and Alan W. Flake, MD, FACS

Autoregulation of Blood Glucose Levels After Injection of Hematopoietic Stem Cells Exposed to Recombinant Adeno-Associated Virus Containing Preproinsulin II Gene 355
Rahul M. Jindal, MD, FRCS, Richard A. Sidner, PhD, and Rita Shah, PhD

Cytokine Regulatory Patterns During Acquired Thymic Tolerance Induced by Intrathymic Inoculation of a Single Allo–Major Histocompatability Class I Peptide 356
Nepal C. Chowdhury, MD, Mark Ingram, MD, Mel Garrovillo, MD, Ming-Xing Jin, MD, Mark A. Hardy, MD, FACS, and Soji F. Oluwole, MD, FRCSC, FACS

Targeting T Cells in the Recipient's Marrow Space Reduces the Conditioning Required to Achieve Mixed Allogeneic Chimerism 358
Beate G. Exner, MD, Michael Neipp, MD, and Suzanne T. Ildstad, MD

"Thymoheart" Creation and Transplantation in Miniature Swine 360
Matthew T. Menard, MD, Kazuhiko Yamada, MD, Kwabena Mawulawde, MD, Denis Lambrigts, MD, Joseph K. Choo, MD, Angelique E. Erhorn, MD, Joanne K. Slisz, BA, Peter Chiotellis, BS, David H. Sachs, MD, and Joren C. Madsen, MD, DPhil

Modulation of Interleukin 12 Gene Expression in Primate Cardiac Allografts During Anti-CD40 Ligand Monoclonal Antibody Treatment..... 362
Andrew C. Chang, MD, Matthew G. Blum, MD, Kelly S. A. Blair, MD, Jian-Ping Zhang, MD, Margie A. Scott, MD, Jane E. Brock, MD, David W. Thomas, PhD, Linda C. Burkly, PhD, Geraldine G. Miller, MD, and Richard N. Pierson III, MD

Accelerated Rate of Acute Rejection of Renal Allografts from Brain Dead Donors 364
J. Pratschke, MD, M. Kusaka, MD, M. J. Wilhelm, MD, W. W. Hancock, MD, PhD, and N. L. Tilney, MD, FRCS, FACS

Noninvasive Monitoring of Pulmonary Arterial Pressure by Telemetry for Long-Term Assessment of Graft Function Following Lung Transplantation..... 366
Bernard Hausen, MD, Tuija Ikonen, MD, PhD, Gerald J. Berry, MD, Laurie Hook, RVT, and Randall E. Morris, MD

Fetal Intramuscular Delivery of Recombinant Adenovirus Results in Persistent Postnatal Transgene Expression in Both Muscle and Liver..... 368
Edmund Y. Yang, MD, PhD, Heung Bae Kim, MD, Aimen F. Shaaban, MD, Ross Milner, MD, N. Scott Adzick, MD, FACS, and Alan W. Flake, MD, FACS

Immunosuppression via Simultaneous Blockade of Transferrin Receptor and Interleukin-2 Receptor..... 369
Prabhakar Baliga, MD, FACS, Allison L. Bayer, BS, and Jennifer E. Woodward, PhD

A Novel CD3-Associated Complex, Similar to the Pre–T-Cell Receptor, Is Present on the Surface of the Facilitating Cell..... 371
Matthew J. Schuchert, MD, Renee D. Wright, and Yolanda L. Colson, MD, PhD

Distinct Roles of Fibronectin Expression by Endothelial Cells and Macrophages in the Infectious Tolerance Pathway in Allograft Recipients..... 373
Ana J. Coito, PhD, Kazuhico Onodera, MD, and Jerzy W. Kupiec-Weglinski, MD, PhD

The Role of Costimulation in Cardiac Xenograft Survival..... 376
Charles F. Schwartz, MD, Ru-Qi Wei, MD, Hua Lin, MD, and Steven F. Bolling, MD, FACS

Potential Role of Soluble Human Leukocyte Antigen in the Regulation of the Immune Response to Allografts..... 377
Michael A. Smith, MD, Nancy J. Poindexter, PhD, Bashoo Naziruddin, PhD, Surendra Shenoy, MD, Jeffrey Lowell, MD, FACS, Todd K. Howard, MD, FACS, and T. Mohanakumar, PhD

Pretreatment of Prenatally Transplanted Allogeneic Marrow with Vascular Endothelial Growth Factor and Stem Cell Factor Prevents Early Allograft Rejection in Chimeric Mice..... 380
Aimen F. Shaaban, MD, Heung Bae Kim, MD, Ross Milner, MD, Christian Fichter, BA, and Alan W. Flake, MD, FACS

Nitric Oxide–Induced Thymocyte and T-Cell Apoptosis Requires p53 and Caspase 3 Activity 382
Sherilyn A. Gordon, MD, Xia R. Zhang, MD, Rosemary A. Hoffman, BS, Richard L. Simmons, MD, FACS, and Henri R. Ford, MD, FACS

Simultaneous Infection with 2 Replication-Defective Adenovirus Vectors Allows Balanced Expression of Multiple Foreign Genes 383
James M. Hammel, MD, Lynn Welch, and Ira J. Fox, MD

Recognition of gal α 1,3-gal by Human Natural Killer Cells Augments the B-Cell IgG Anti-gal Antibody Response 385
Ranjit John, MD, Pawel Kwiatkowski, MD, Scott Choi, BA, Jan Ankersmit, MD, Shu-Feng Wang, MD, John H. Artrip, MD, Niloo M. Edwards, MD, FACS, and Silviu Itescu, MD

The Influence of Acute Hepatic Failure in the Host on Survival and Function of Cold Preserved Liver Allografts 388
Sasan Roayaie, MD, Liqing Wang, MD, PhD, John Basile, MD, Peter Boros, MD, PhD, and Charles M. Miller, MD, FACS

Reduction of Transplantation-Induced Microvascular Permeability by Treatment with Anti–Intercellular Adhesion Molecule 1 Monoclonal Antibodies 390
Eftal Gudemez, MD, Murat Turegun, MD, Stacy Porvasnik, BS, James Zins, MD, and Maria Siemionow, MD, PhD

Rescue from Lethal Total Body Irradiation by Allogenic Marrow Stromal Cells 392
G. Russell Reiss, MD, John T. Langell, PhD, Verdi J. DiSesa, MD, FACS, and Darwin J. Prockop, MD, PhD

Chapter X—Surgical Oncology

A Naturally Occurring Mutation in Human c-Src Is Activating, Transforming, and Augmenting Metastatic Potential 395
Rosalyn B. Irby, PhD, Weiguang Mao, MD, Domenico Coppola, MD, Jimmy Kang, BS, Jean-Marc Loubeau, MD, Richard Jove, PhD, Donald J. Fujita, PhD, Richard Karl, MD, FACS, and Timothy J. Yeatman, MD, FACS

Antiangiogenic Therapy of Orthotopic Human Prostate Cancer in Mice Guided by Prostate-Specific Antigen 396
Dipak Panigrahy, MD, Wolf-Dietrich C. Beecken, MD, PhD, Thomas Boehm, MD, Karen Keough, BS, Robert Stewart, MD, Evelyn Flynn, MA, Eike-Gert Achilles, MD, PhD, and Judah Folkman, MD, FACS

Differentially Expressed Genes in a Model of Tumor Metastasis and Angiogenesis 398
Maggie C. Lee, MD, Jing L. Wang, PhD, James Tomlinson, MD, Sanford H. Barsky, MD, and Mai Nguyen, MD

Tumor Cell Thrombospondin-1 Promotes Tumor Cell Invasion Through Upregulation of the Urokinase Plasminogen Activator and Its Receptor 399
Daniel Albo, MD, PhD, Vicki L. Rothman, BS, David D. Roberts, PhD, and George P. Tuszynski, PhD

CD44H Alternative Splicing in Colon Carcinomas Influences Metastatic Potential 402
Seung Ho Choi, MD, Kazuhisa Takahashi, MD, PhD, Hiroshi Eto, MD, PhD, Sam S. Yoon, MD, and Kenneth K. Tanabe, MD

Expression of the Proapoptotic Gene *bak* Predicts Recurrence and Decreased Survival of Resectable Pancreatic Cancer 403
Richard J. Bold, MD, Douglas B. Evans, MD, FACS, Karen R. Cleary, MD, Corazon D. Bucana, PhD, and David J. McConkey, PhD

Recombinant Human Soluble Tumor Necrosis Factor Receptor Improves Food Intake in Anorectic Tumor-Bearing Rats 405
Giovanni F. Torelli, MD, Michael M. Meguid, MD, PhD, FACS, Madhu Varma, MD, Lyle L. Moldawer, PhD, Alessandro Laviano, MD, and Filippo Rossi Fanelli, MD

Diagnostic Accuracy of Sentinel Node Mapping in Patients with Breast Cancer Following Excisional Versus Nonexcisional Biopsy 406
Siddharth Singh Bass, MD, Solange Pendas, MD, NiNi K. Ku, MD, Claudia Berman, MD, Douglas S. Reintgen, MD, FACS, and Charles E. Cox, MD, FACS

Oncolytic Viral Therapy for Human Colorectal Cancer Using a Multimutated Herpes Simplex Virus Type 1 (G207) 408
David A. Kooby, MD, John F. Carew, MD, Marc W. Halterman, BS, Joseph Bertino, MD, Howard J. Federoff, MD, PhD, and Yuman Fong, MD

Adenovirus-Mediated Interleukin-12 Gene Therapy in Metastatic Breast Cancer 410
Celia M. Divino, MD, Wen Yang, MD, PhD, Shu-Hsia Chen, PhD, Savio L. C. Woo, PhD, and Steven T. Brower, MD, FACS

Molecular Detection of Pancreatic Carcinoma with a Novel Multimarker Reverse-Transcriptase Polymerase Chain Reaction Assay 412
Anton J. Bilchik, MD, PhD, Miki Miyashiro, MD, PhD, Christine Kuo, BS, MD, Mark Kelley, MD, and Dave S. B. Hoon, PhD

Interleukin-12–Based Adenovirus Gene Therapy of Hepatocellular Cancer 414
Kahlil J. Andrews, MD, Charles M. Vollmer, Jr., MD, Fritz C. Eilber, MD, Lisa H. Butterfield, PhD, Antoni Ribas, MD, William H. McBride, DSc, PhD, and James S. Economou, MD, PhD, FACS

Evidence for a Novel Glucose Transporter in Sarcomas 416
John E. Phay, MD, and Jeffrey F. Moley, MD, FACS

Downregulation of HER2/*neu* Expression by Antisense Oligonucleotides Induces Apoptosis in Human Breast Cancer Cells That Overexpress HER2/*neu* 418
Haeri Roh, PhD, James Pippin, BS, and Jeffrey A. Drebin, MD, PhD

Membrane Type-1 Matrix Metalloproteinase–Dependent Tumor Invasion Is Enhanced by Neutrophil-Derived Serine Proteinases 419
Ben J. Z. Pocock, MBBS, Sara Monea, MS, Jess D. Schwartz, MD, Neal Chuang, MD, Stuart G. Marcus, MD, Kenneth Eng, MD, Paolo Mignatti, MD, and Peter Shamamian, MD

Gene Therapy Strategy Using a Chimeric Fv Receptor to Target the HER-2/*neu* Breast Cancer Antigen 421
Lee G. Wilke, MD, Christopher M. Reynolds, MD, Michael S. Friedman, BS, Alfred E. Chang, MD, FACS, Kevin T. McDonagh, MD, and James J. Mulé, PhD

Inhibition of Angiogenesis and Matrix Metalloproteinase-2 Activity by Dexrazoxane (Zinecard) May Mediate Its Antitumor Effects 424
Neal Chuang, MD, Christine J. Ren, MD, Sandra Mendoza, BS, Peter Shamamian, MD, Daniel F. Roses, MD, FACS, Daniel B. Rifkin, PhD, Abraham Chachoua, MD, and Richard L. Shapiro, MD

Transformation of Intestinal Epithelium by Transforming Growth Factor-β1 Results in Enhanced Invasion Secondary to Upregulation of the Urokinase Plasminogen Activator 427
Christine A. O'Mahony, MD, Daniel Beauchamp, MD, FACS, Daniel Albo, MD, PhD, H. Sheng, MD, J. Shao, MD, George P. Tuszynski, PhD, and David H. Berger, MD, FACS

Gangliosides as Potential Immunotherapy Targets in Pancreatic Cancer 429
Kyo U. Chu, MD, Mepur H. Ravindranath, PhD, Alexandra Gonzales, BS, Anton J. Bilchik, MD, PhD, and Donald L. Morton, MD, FACS

Identification of a Glycoprotein Ligand for E-Selectin on Colon Cancer Cells .. 430
James Tomlinson, MD, Jing L. Wang, PhD, Maggie C. Lee, MD, Joyce Bischoff, PhD, and Mai Nguyen, MD

Presentation of Tumor Antigens by Peripheral Blood–Derived Dendritic Cells in Patients with Lung Cancer 432
Wuyi Xia, MD, David M. Jablons, MD, FACS, and Robert B. Cameron, MD, FACS

Upregulation of Tissue-Specific Suicide Gene Expression in Melanoma Using a Melanocyte-Specific Enhancer Results in Increased Specific Cytotoxicity in Melanoma Cells in Vitro 434
Bernard J. Park, MD, Charles K. Brown, MD, PhD, Steven K. Libutti, MD, H. Richard Alexander, MD, FACS, and David L. Bartlett, MD

In Vivo Tumors That Overexpress Endothelial Monocyte–Activating Polypeptide II Demonstrate Upregulation of Tumor Necrosis Factor Receptor p55 on Tumor Neovasculature 436
Peter C. Wu, MD, Adam C. Berger, MD, James Huang, MD, Michael Gnant, MD, Ewa Turner, MS, H. Richard Alexander, MD, FACS, and Steven K. Libutti, MD

Sodium Salicylate Inhibits Tumor Necrosis Factor–Induced IκB-α Phosphorylation and Degradation in Human Pancreatic Cancer 438
Theodore P. McDade, MD, Richard A. Perugini, MD, Frank J. Vittimberga, Jr., MD, Rebecca C. Carrigan, BA, and Mark P. Callery, MD, FACS

Angiogenesis Is an Early Event in the Adenoma-Carcinoma Sequence in Human Colon Cancer 440
James C. Watson, MD, Harry S. Cooper, MD, James S. Babb, PhD, Elin R. Sigurdson, MD, PhD, FACS, and Andres J. P. Klein-Szanto, MD

Thrombospondin-1 in Squamous Cell Carcinomas of the Head and Neck: Effects on Production of Plasminogen Activator Inhibitor Type-1 and Tumor Cell Adhesion 442
Juan P. Arnoletti, MD, Daniel Albo, MD, PhD, Mark S. Granick, MD, and George P. Tuszynski, PhD

Novel Therapeutic Agents Inhibit in Vitro Invasion, Adhesion, and Proliferation of Human Liver Cancer Cells..... 443
Xiao-min Wang, MD, PhD, Jing Li, MD, Xiaofu Wang, BS, and B. Mark Evers, MD, FACS

Germline Variants in the *BAP1* Candidate Tumor Suppressor Gene Implicate the Ubiquitin Proteolytic Pathway in BRCA1 Function..... 446
Monja L. Proctor, MD, David E. Jensen, PhD, Gail E. Tomlinson, MD, PhD, Frank J. Rauscher III, PhD, and John D. Minna, MD

Fibroblast Growth Factor-1 Induces Resistance to Inflammatory-Mediated Apoptosis in Pancreatic Cell Line..... 448
Selwyn M. Vickers, MD, FACS, Mary Green, BS, Lee Ann MacMillan-Crow, PhD, Allan Pickens, MD, and John A. Thompson, PhD

The Role of Adenylyl Cyclase–Linked Mitogen-Activated Protein Kinase Signaling in the Regulation of Human Hepatocellular Carcinoma Growth 450
C. Max Schmidt, MD, PhD, Iain H. McKillop, PhD, Paul A. Cahill, PhD, and James V. Sitzmann, MD, FACS

Secretion of a Large Glycoprotein (MUC1) from Epithelial Cancer Cells Mediating Immune Suppression by Inducing T-Cell Arrest..... 452
Allen K. Chan, MD, Diane C. Lockhart, MD, Wolfram von Bernstorff, MD, Remco A. Spanjaard, PhD, Peter S. Goedegebuure, PhD, and Timothy J. Eberlein, MD

Monitoring of Proliferator-Activated Receptor-γ–Induced Adipocyte Differentiation in F442A Cells and Human Liposarcoma Using Magic Angle Spinning ^{1}H-NMR Spectroscopy 454
Patrick Weybright, MD, Natalee Campbell, Christopher Fletcher, MD, George Demetri, MD, and Samuel Singer, MD, FACS

Downregulation of HER2/*neu* Expression Using Combinations of Antisense Oligonucleotides and Monoclonal Antibodies Results in Enhanced Antitumor Effects..... 456
Craig B. Boswell, MD, James Pippin, BS, and Jeffrey A. Drebin, MD, PhD

Competition for Binding Between Peptides in Peptide-Based Vaccines 458
Lee W. Thompson, MD, Laurence H. Brinckerhoff, MD, and
Craig L. Slingluff, Jr., MD, FACS

Chapter XI—Gynecology and Obstetrics

Radiofrequency Ablation of Liver in the Fetal Sheep: A Model for
Treatment of Sacrococcygeal Teratoma in the Fetus 461
Bettina Westerburg, MD, Toshio Chiba, MD, Walter Gantert, MD,
Craig T. Albanese, MD, Michael R. Harrison, MD, and
Russell W. Jennings, MD

Excisional Wound Healing in the Fetal Rat 463
Richard J. Mackool, MD, Norman Rowe, MD, Babak Mehrara, MD,
Dorothy Chau, MD, Stephen McCormick, MD, Michael T. Longaker, MD,
and George Gittes, MD

Endogenous Expression of Matrix Metalloproteinases 7 and 9 and Their
Tissue Inhibitors as a Function of Gestational Age in Fetal Rat Skin 464
Thomas Y. Lee, MD, Gyu S. Chin, MD, Dorothy Chau, MD,
Chia Soo, MD, Michael T. Longaker, MD, and George K. Gittes, MD

Ultrasound Back-Scatter Microscopy–Guided Injection: A Vehicle for in Utero
Cardiac Gene Therapy During Early Organogenesis 466
Juan Grau, MD, Norman M. Rowe, MD, Dorothy Chau, MD,
Alexander R. Marmureanu, MD, Michael T. Longaker, MD,
Daniel Turnbull, PhD, and George K. Gittes, MD

Introduction of Genes into the Embryonic Mouse Pancreas Using an
Adenoviral Vector 469
Alexander R. Marmureanu, MD, Michael I. Rose, MD,
Christopher A. Crisera, MD, Kari L. Colen, BA, Patrick R. Connelly, MS,
Michael T. Longaker, MD, and George K. Gittes, MD

In Utero Hematopoietic Stem Cell Transplantation in Mice Transgenic for
Human Hemoglobinopathy: Selective Advantage for Donor Red Cells 471
Ross Milner, MD, Heung Bae Kim, MD, Aimen Shaaban, MD,
Christian Fichter, BA, Michael Scully, BA, Toshio Asakura, MD, PhD,
and Alan W. Flake, MD, FACS

Microgravity Culture of the Embryonic Mouse Pancreas 472
Neil R. Pellis, PhD, Michael I. Rose, MD, Dale C. Brown, BS, Christopher A. Crisera, MD, Kari L. Colen, BA, Patrick R. Connelly, MS, Michael T. Longaker, MD, and George K. Gittes, MD

Soluble Factors Alter Signal Transduction in T Lymphocytes Derived from Ovarian Tumors 475
Diane C. Lockhart, MD, Allen K. Chan, MD, Cara Douville, Simona Mak, Amanda Carritte, Timothy J. Eberlein, MD, FACS, and Peter S. Goedegebuure, PhD

Rapid, Nongenomic Effects of Estrogen Involve Tamoxifen-Insensitive, G Protein–Coupled Membrane Receptors 477
Desmond C. Winter, MD, Brian J. Harvey, PhD, DSc, Gerald C. O'Sullivan, MCh, FRCSI, and John P. Geibel, MD, DSc

Estradiol Modulates Tumor-Induced Anorexia and Feeding Pattern 479
Jia-Ke Chai, MD, Madhu Varma, MD, Michael M. Meguid, MD, PhD, FACS, Giovanni F. Torelli, MD, and Zhong-jin Yang, MD

Maternal Colloid Osmotic Pressure After Fetal Surgery 481
Harold N. Lovvorn III, MD, Timothy M. Crombleholme, MD, FACS, Henry Drott, PhD, Alan W. Flake, MD, FACS, and N. Scott Adzick, MD, FACS

Defect or Normal Anatomy? The Female Anal Sphincter 483
Ruth Bollard, FRCS, Kevin Phillips, MRCOG, Stephen Lindow, MRCOG, and Graeme Duthie, MD, FRCS

Chapter XII—Neurological Surgery

Cavernous Angiomas: A Report of 31 Surgical Cases 486
L. P. Caragine, Jr., MS, MD, Vickie L. Gordon, NP, MSN, Amgad Matter, MD, Razvan Bucuic, MD, Lucia Zamorano, DrMed, and Fernando G. Diaz, MD, PhD

Clinical Evaluation of a Novel Halo Pin Design 488
Dante J. Morassutti, MD, FRCSC, Michael J. Voor, PhD, and Cyna Khalily, MD

Growth Factor Production by Suture Fusion in Vitro 490
Patrick R. Connelly, MS, Julide S. Sagiroglu, MD, Babak J. Mehrara, MD, Dorothy Chau, MD, Joseph G. McCarthy, MD, George K. Gittes, MD, and Michael T. Longaker, MD

Adenovirus-Mediated Transmission of a Dominant Negative Truncated Transforming Growth Factor Beta Receptor Inhibits in Vitro Mouse Cranial Suture Fusion 492
Babak J. Mehrara, MD, Harold Fernandez, MD, Dorothy Chau, MD, Julide Sagiroglu, MD, Douglas Steinbrech, MD, Hari Ueno, MD, Juan Grau, MD, George K. Gittes, MD, and Michael T. Longaker, MD

Studies in Cranial Suture Biology: Impact of Dura Mater in Cranial Suture Fusion 494
Julide S. Sagiroglu, MD, Babak J. Mehrara, MD, Norman M. Rowe, MD, Joseph G. McCarthy, MD, George K. Gittes, MD, and Michael T. Longaker, MD

Effects of Implantation of Dopaminergic Neurons into the Ventromedial Nucleus of the Hypothalamus 496
Sergueï Fetissov, MD, PhD, Giovanni F. Torelli, MD, Michael M. Meguid, MD, PhD, FACS, Go Miyata, MD, PhD, and Madhu Varma, MD

Induction of Microglial Chimerism by in Utero Xenogeneic Astrocyte Transplantation 498
Adina Kay Knight, MD, Timothy M. Crombleholme, MD, FACS, Miguel Sena-Esteves, PhD, and Edward Kaye, MD

Endothelins 1 and 3 Are Angiogenic 500
Eugene L. Bek, MD, Gregory M. Organ, MD, Lawrence P. Ferguson, MD, and Marvin A. McMillen, MD, FACS

Heme Oxygenase 1 and Ferritin Proteins Are Increased in Cerebral Arteries After Subarachnoid Hemorrhage in Monkeys 501
R. Loch Macdonald, MD, PhD, Bryce K. Weir, MD, Linda S. Marton, PhD, Emily Windmeyer, Lydia Johns, Andrew Kowalczuk, BA, and George Lin, BA

Cerebroprotection by Inhibiting 3-Aminopropanal in a Rodent Model of Stroke 503
Michael Bilof, MD, Yousef Al-Abed, PhD, Svetlana Ivanova, MS, Richard Bucala, MD, PhD, and Kevin J. Tracey, MD

Differential Display of Gene Expression in Cerebral Edema Induced by Fulminant Hepatic Failure 504
Jody E. Margulies, PhD, Olivier Detry, MD, Jacek Rozga, MD, PhD, and Achilles A. Demetriou, MD, PhD, FACS

Effect of Standard and Alternative Prehospital Resuscitation in a Porcine Model of Hemorrhagic Shock and Head Injury 506
Lawrence M. Novak, MD, Paul R. Bourguignon, MD, Steven R. Shackford, MD, FACS, Turner M. Osler, MD, and Patricia Nichols, DVM

Chapter XIII—Orthopaedic Surgery

Neutralizing Antibody to Tumor Growth Factor Beta 1 Improves Postoperative Range of Motion in Flexor Tendon Wound Healing 509
James Chang, MD, Richard Thunder, BS, Daniel Most, MD, Michael T. Longaker, MD, and William C. Lineaweaver, MD

End-to-Side Loop Neurorrhaphy in Preventing Neuroma Formation: Does the Size of the Loop Matter? 510
Sai S. Ramasastry, MD, FRCS, Yoko Miura, MD, Roberto Gonzales-Cruz, MD, Nini Davis, RN, and Julio Hochberg, MD, FACS

Functional Evaluation of End-to-Side Neurorrhaphy 512
Kang Liu, MD, Long-En Chen, MD, PhD, Anthony V. Seaber, and James R. Urbaniak, MD

Transforming Growth Factor Beta 1 and Basic Fibroblast Growth Factor Modulate Expression of Vascular Endothelial Growth Factor by Osteoblasts in Vitro 513
Pierre B. Saadeh, MD, Babak J. Mehrara, MD, Douglas S. Steinbrech, MD, Matthew E. Dudziak, BS, Arun K. Gosain, MD, George K. Gittes, MD, and Michael T. Longaker, MD

Transforming Growth Factor Beta Superfamily Members: Role in Cartilage Modeling 516
Sally R. Frenkel, PhD, Pierre B. Saadeh, MD, Babak J. Mehrara, MD, Douglas S. Steinbrech, MD, Rubina S. Cocker, MD, Steven A. McCormick, MD, George K. Gittes, MD, and Michael T. Longaker, MD

Adenovirus-Mediated Tumor Growth Factor Beta 1 Gene Therapy of Osteoblasts in Vitro 518
Harold Fernandez, MD, Babak J. Mehrara, MD, Pierre Saadeh, MD, Douglas Steinbrech, MD, Juan Grau, MD, George K. Gittes, MD, and Michael T. Longaker, MD

Blockade of L-Selectin–Mediated Leukocyte Adhesion Attenuates Skeletal Muscle Reperfusion Injury 521
Zuo-Qin Yan, MD, Michael P. Bolognesi, MD, Long-En Chen, MD, PhD, Anthony V. Seaber, and James R. Urbaniak, MD

Characterization of Growth, Maturation, and Expression of Vascular Endothelial Growth Factor by Osteoblasts in Response to Hypoxia..... 522
Douglas S. Steinbrech, MD, Babak J. Mehrara, MD, Pierre B. Saadeh, MD, Matthew E. Dudziak, BS, Rene P. Gerrets, MA, Joseph G. McCarthy, MD, George K. Gittes, MD, and Michael T. Longaker, MD

Ischemic Preconditioning Improves Postischemic High-Energy Phosphate Concentration in Rat Skeletal Muscle 525
Agostino Mattei, MD, Lorenz Gürke, MD, Karla Chaloupka, MD, Axel Marx, MD, Felix Harder, MD, FACS, and Michael Heberer, MD, FACS

A Potential Role for Tissue Factor in Reperfusion Injury in Skeletal Tissue 526
Michael P. Bolognesi, MD, Brian Annex, MD, Michael Thompson, Long-En Chen, MD, PhD, Anthony V. Seaber, and James R. Urbaniak, MD

Chapter XIV—Outcomes and Quality of Life

Lymphedema: A Quality of Life Issue for Breast Cancer Patients..... 528
Laurel C. Soot, MD, Karen Ulloth, MD, FACS, Louis D. Homer, MD, PhD, Deb Walts, RN, and Nathalie McDowell Johnson, MD, FACS

Should Carotid Endarterectomy Be Replaced by Carotid Angioplasty and Stenting: A Cost-Effectiveness Analysis..... 530
Sheela T. Patel, MD, Paul B. Haser, MD, James P. Hollenberg, MD, Harry L. Bush, Jr., MD, FACS, and K. Craig Kent, MD, FACS

Effect of Integrated Air and Ground Transportation on Outcome 531
Thomas Z. Hayward III, MD, MBA,
Robert W. Anderson, MD, MBA, FACS, and
Gregory S. Georgiade, MD, FACS

Survival of Nursing Home Patients Referred for Surgery 533
Joshua L. Levine, MD, Stephen A. Michalski, MD, FACS,
Ketul J. Patel, MD, Michael Kalimian, Michael Nelson, BS, and
Michael E. Zenilman, MD, FACS

General Health Status Following Trauma Is Most Contingent on Mental Health Outcome 534
Andrew J. Michaels, MD, MPH, Christina H. Moon, BA,
Claire E. Michaels, MD, Joshua S. Smith, BA, Paul A. Taheri, MD, FACS,
Wendy L. Wahl, MD, FACS, Stewart C. Wang, MD, PhD,
David J. Dries, MD, FACS, Marc A. Zimmerman, PhD, and
Christopher Peterson, PhD

Evidence-Based Algorithm Development: A Strong Basis for Clinical Practice ... 537
Thomas M. Beutler, MD, Cheryl I. Anderson, RN, and
Frederick M. Ilgenfritz, MD

Analysis of Cost and Length of Stay for Renal Transplantation Using a Clinical Care Pathway 539
Niraj M. Desai, MD, Robert A. Grossman, MD, Shreeram Aradhye, MD,
Mary Alice Musser, MSN, RN, Phyllis Gatto, MSN, RN,
Clyde F. Barker, MD, FACS, Ali Naji, MD, PhD, FACS, and
Kenneth L. Brayman, MD, PhD, FACS

Clinical Pathways Reduce Costs and Provide Quality Care in Abdominal Aortic Aneurysm Repairs 540
Eugene S. Lee, MD, Shane E. Wernsing, BA,
Carolyn A. Robinson, RN, BSN, CVN, Ronald W. Hedblad, RT,
Patricia A. Valusek, BA, Michael A. Kuskowski, PhD, and
Steven M. Santilli, MD, PhD

Negative Impact of Older Age on Functional Recovery Following Coronary Artery Bypass 542
Robert D. Stewart, MD, Stephen J. Lahey, MD, FACS,
Sidney Levitsky, MD, FACS, and Christian T. Campos, MD

Recent Trends in Inpatient Surgery for the Insured Under Age 65 Population: A Longitudinal Statewide Analysis 544
Helen M. Bowman, MS, Toby A. Gordon, ScD, John D. Hundt, CPA, MHS,
and John L. Cameron, MD, FACS

Predictors of Patient Satisfaction in an Outpatient Plastic Surgery Clinic..... 545
Kevin C. Chung, MD, MS, Jennifer B. Hamill, MPH, Hyungin M. Kim, ScD, Madonna R. Walters, MS, RN, and Edwin G. Wilkins, MD

Risk Factors for Adverse Outcomes After Dialysis Access Placement..... 547
Renae E. Stafford, MD, and David C. Borgstrom, MD, FACS

Injury Severity Scores Predict Outcomes in Blunt Hepatic Injury..... 549
David P. Foley, MD, Frank J. Vittimberga, Jr., MD, Paul E. Bankey, MD, FACS, Wayne E. Silva, MD, FACS, Keelee J. MacPhee, MD, and Mark P. Callery, MD, FACS

Office-Based Wire-Guided Open Breast Biopsy Under Local Anesthesia Is Accurate and Cost-Effective..... 550
Katherine T. Morris, MD, Rodney F. Pommier, MD, and John T. Vetto, MD, FACS

A New Look at Surgical Site Infections: The Role of *Staphylococcus Aureus* Nasal Carriage..... 552
Trish M. Perl, MD, Loreen Herwaldt, MD, Michael A. Pfaller, MD, and Joseph J. Cullen, MD, FACS

Comparison of Outcomes and Quality of Life Improvement Between Ileoanal Pouch Procedures and Proctocolectomy with Ileostomy..... 554
Scott A. Seidel, MD, Shari E. Peach, MD, Martin Newman, MD, and Kenneth W. Sharp, MD, FACS

The Surgeon's Decision for Lower Extremity Bypass Operation Frequently Disagrees with Formal Surgical Decision Analysis..... 556
Gloria A. Rios, MD, Thomas E. Brothers, MD, FACS, Jacob G. Robison, MD, FACS, and Bruce M. Elliott, MD, FACS

Improved Clinical Outcome Following Implementation of a Clinical Pathway for the Management of Blunt Thoracic Trauma..... 558
Richard J. Leone, Jr., MD, PhD, and Jeffrey S. Hammond, MD, MPH, FACS

Case Volume and Outcomes in Resection for Colorectal Carcinoma..... 559
Daniel G. Tang, BA, Helen M. Bowman, MS, Toby A. Gordon ScD, Steven Nurse-Findlay, BA, Michael A. Choti, MD, FACS, Howard S. Kaufman, MD, Jeffrey S. Bender, MD, FACS, John W. Harmon, MD, FACS, and John L. Cameron, MD, FACS

Determinants of Convalescence After Inguinal Hernia Repair 561
Jeffrey S. Barkun, MD, MSc, Marvin J. Wexler, MD, and
Myriam Fernandez, RN

Impact of Managed Care on Hepatopancreatobiliary Surgery at Academic Medical Centers in California 562
Robert E. Glasgow, MD, Jonathan A. Showstack, PhD, MPH, and
Sean J. Mulvihill, MD, FACS

A Multivariate Analysis of Risk Factors in 1,008 Orthotopic Liver Transplant Patients Reveals Significant Influence of Panel Reactive Antibody on Patient and Graft Survival 564
Jane L. Kakkis, MD, Paul Michaels, BS, Jeffrey Gornbein, PhD,
Paul Terasaki, MD, David Imagawa, MD, PhD, and
Ronald Busuttil, MD, PhD

End-Stage Renal Disease and Infrainguinal Bypass Grafting: Is It Appropriate? 566
Mehrzad Bozorgnia, MD, Gary G. Nicholas, MD, FACS,
Susan A. Nastasee, BS, and James F. Reed III, PhD

Chapter XV—Pediatric Surgery

Multidrug Resistance 2 Gene Expression in the Murine Liver: Relevance to the Development of Parenteral Nutrition–Associated Cholestasis 569
Benjamin Forbush, MD, Irfan Kiristioglu, MD,
Daniel H. Teitelbaum, MD, FACS, Michael D. Eisenbraun, and
Kathleen P. Heidelberger, MD

Enhancement of Mucosal Mass Does Not Correlate with Substrate Absorption Following Intestinal Adaptation 571
Karim Alavi, MD, Dahong Yu, PhD, and Marshall Z. Schwartz, MD, FACS

Effects of Lymphoid Cells on Bacterial Translocation, Epithelial Resistance, and Permeability in an Enterocyte Cell Culture Model 573
Noriaki Usui, MD, Arnold G. Coran, MD, FACS, A. Semih Gork, MD,
Min Chen, MD, Robert A. Drongowski, and
Carroll M. Harmon, MD, PhD, FACS

Delayed Administration of Novel Nitric Oxide Scavenger, NOX, Is Effective in Reducing Bacterial Translocation After Endotoxemia 575
Eva C. Dickinson, MD, Recep Tuncer, MD, Patricia Boyle, Melissa Garrett, MS, and Henri R. Ford, MD, FACS

Morphogenesis and Differentiation of Tissue-Engineered Small Intestine After Anastomosis to the Native Small Bowel 577
Stephen S. Kim, MD, Satoshi Kaihara, MD, Mark S. Benvenuto, BS, Rosa Choi, MD, Byung-Soo Kim, MS, David J. Mooney, PhD, and Joseph P. Vacanti, MD

Organogenesis of Tracheoesophageal Fistula: Respiratory Origin of the Distal Esophagus 580
Christopher A. Crisera, MD, Patrick R. Connelly, MS, Alexander R. Marmureanu, MD, Michael I. Rose, MD, Kari L. Colen, BA, Min Li, MS, Michael T. Longaker, MD, and George K. Gittes, MD

Organotypic Differentiation of Tissue-Engineered Neointestinal Mucosa: The Role of Mesenchymal–Endodermal Interaction 583
Gregory M. Organ, MD, Arif Khan, MD, Harold T. Robinson, BS, Betsy Schloo, MD, and Marvin A. McMillen, MD, FACS

Partial Liquid Ventilation and Positive End-Expiratory Pressure Reduce Ventilator-Induced Lung Injury 585
Preston B. Rich, MD, Craig A. Reickert, MD, Stefania Crotti, MD, Simon A. Mahler, BS, Samir S. Awad, MD, William R. Lynch, MD, Kent J. Johnson, MD, and Ronald B. Hirschl, MD, MS

Prenatal Tracheal Occlusion Enhances Lung Growth in the Nitrofen-Induced Rat Congenital Diaphragmatic Hernia Model 587
Yoshihiro Kitano, MD, Daniel von Allmen, MD, Edmund Y. Yang, MD, PhD, Theresa M. Quinn, MD, Masaki Kanai, MD, N. Scott Adzick, MD, FACS, and Alan W. Flake, MD, FACS

Paclitaxel Inhibits Growth of Murine Hepatoma and Preserves Hepatic Replication Following Partial Hepatectomy 590
Alan P. Ladd, MD, Eric R. Jensen, MD, Brian E. Kogon, MD, Scott A. Engum, MD, and Jay L. Grosfeld, MD, FACS

Selective Replication of a Mutant Adenovirus in Neuroblastoma 591
Andrew M. Davidoff, MD, Stephen J. Shochat, MD, FACS, Catherine Y. C. Ng, MSc, and Elio F. Vanin, PhD

Pathologic Angiogenesis in a Metastasizing Model of Human Wilms Tumor 593
Mark L. Kayton, MD, Dorothy H. Rowe, MD, Kathleen M. O'Toole, MD, Mark Ingram, MD, Charles J. H. Stolar, MD, FACS, and Jessica J. Kandel, MD

Chapter XVI—Plastic Surgery

Downregulation of Apoptosis Genes Accounts for Aberrant Cellular Growth in Keloid Tissue 596
David N. Sayah, MD, William W. Shaw, MD, FACS, E. Carmack Holmes, MD, FACS, Chia Soo, MD, James Watson, MD, Michael T. Longaker, MD, and Kang Ting, DDS, PhD

Microseeding Provides Efficient in Vivo Gene Transfer to the Periosteum 598
Bohdan Pomahac, MD, Feng Yao, PhD, Tor Svensjö, Stefan Preuss, MD, and Elof Eriksson, MD, PhD, FACS

The Association of *mda*-7, a Melanoma Differentiation–Associated Gene, with Cell Proliferation and Wound Healing 600
Chia Soo, MD, William W. Shaw, MD, FACS, Michael T. Longaker, MD, FACS, Charles Bertolami, DMD, DMSc, Xuguang Zhang, PhD, E. Carmack Holmes, MD, FACS, and Kang Ting, DMD, DMSc

NEL-2 Gene Is Associated with Bone Formation in Craniosynostosis 602
Kang Ting, DMD, PhD, Xuguang Zhang, DDS, PhD, Shun'ichi Kuroda, PhD, John B. Mulliken, MD, and Michael T. Longaker, MD

ADP Ribosylation Controls Vascular Endothelial Growth Factor Activity 604
John J. Feng, MD, Gabriel Ledger, BS, James S. Constant, MD, Thomas K. Hunt, MD, FACS, and M. Zamirul Hussain, PhD

Mixed Allogeneic Chimeras as a Model for Tolerance Induction in Composite Tissue Allografts: Chimeric Stability and Functional Recovery 605
Robert D. Foster, MD, Larry Fan, AM, Michael Niepp, MD, Christina Kaufman, MD, S. G. Chen, MD, Nancy Ascher, MD, PhD, Suzanne Ildstad, MD, Stephen J. Mathes, MD, and James P. Anthony, MD

Increased Oxygen Tension and Wound Fluid Vascular Endothelial Growth Factor Levels 607
Jeffrey J. Gibson, MD, Ahmad Y. Sheikh, Mark D. Rollins, MD, Harriet W. Hopf, MD, and Thomas K. Hunt, MD, FACS

Administration of Interleukin 1 Receptor Antagonist, An Antiinflammatory, Counter-Regulatory Cytokine, Promotes Bone Marrow Failure After Burn Injury 610
Katharina Pellegrin, MD, Verlyn M. Peterson, MD, and Lawrence L. Ketch, MD

Modulation of Human Caco-2 Intestinal Epithelial Cell Proliferation by Engagement of the α5-Integrin Subunit Is Tyrosine Kinase Dependent..... 612
Nancy J. Emenaker, PhD, RD, and Marc D. Basson, MD, PhD, FACS

Interleukin 10 Inhibition of Antigen-Presenting Cell Function in Cultured Human Monocytes..... 614
Tim Roth, MS, Jim Doyle, PhD, Robin Smith, MS, YaQi Li, MD, Raymond Dunn, MD, and W. Thomas Lawrence, MPH, MD

Cytokine Levels at Open Fractures Using Microdialysis 616
Aaron J. Mayberry, MD, Bruce Klitzman, PhD, Jonathan A. Mathy, BS, L. Scott Levin, MD, Terry M. Phillips, PhD, and Spencer A. Brown, PhD

Transforming Growth Factor β_2 Increases DNA Synthesis and Collagen Production in Keloid Fibroblasts 617
Paul D. Smith, MD, Katherine Siegler, PhD, Xue Wang, PhD, and Martin C. Robson, MD, FACS

Monophosphoryl Lipid A Induces Pharmacologic Preconditioning in Skeletal Muscle: Role of the K^+-ATP Channel..... 619
Claudio Maldonado, PhD, Santiago Ramirez, MD, Edwin E. Quan, MD, Gordon R. Tobin, MD, FACS, and John H. Barker, MD, PhD

Feedback (Closed-Loop) Control of a Urinary Graciloplasty Neosphincter..... 621
Erik Zonnevijlle, MD, Gustavo Perez Abadia, MD, Naveen Somia, MD, Richard Stremel, PhD, Claudio Maldonado, PhD, Steven Koenig, PhD, Martin Palacio, MD, Paul Werker, MD, PhD, Moshe Kon, MD, PhD, and John Barker, MD, PhD

Wound Fluid Regulates Nitric Oxide Expression in Fibroblasts 623
Maria B. Witte, MD, David T. Efron, MD, Teruo Kiyama, MD, PhD, and Adrian Barbul, MD, FACS

The Effect of $CD4^+$ and $CD8^+$ Cell Depletion on Wound Healing 624
Peter A. Davis, MA, FRCS, David J. Corless, MD, FRCS, Richard Aspinall, BSc, PhD, and Christopher Wastell, MS, FRCS

Force Deficits in Neurovascular Muscle Transfers 627
Paul S. Cederna, MD, Tomoaki Eguchi, MD, Jack H. van der Meulen, PhD, Melanie G. Urbanchek, PhD, and William M. Kuzon, Jr., MD, PhD, FRCSC, FACS

Altered Glutathione Status in 2 Examples of Chronic Human Wounds 629
Bradley P. Mudge, MD, Craig Harris, PhD, and Riley S. Rees, MD, FACS

A Biomechanical and Ultrastructural Study of Coronal Synostosis 631
Wayne Ozaki, MD, DDS, Steven R. Buchman, MD, Coleen M. Glessner, BS, Mark P. Mooney, PhD, and H. Wolfgang Losken, MD

Long-Term Tolerance to Peripheral Nerve Allografts with Donor Antigen and Anti-CD4 Monoclonal Antibody (RIB 5/2) Pretreatment 633
Vaishali B. Doolabh, MD, Kentaro Motoyama, MD, Susan E. Mackinnon, MD, FRCS, FACS, and M. Wayne Flye, MD, PhD, FACS

The Effects of Hyperbaric Oxygen Treatment on Neutrophil Expression of CD18 in a Rat Model of Ischemia Reperfusion 635
Jon L. Larson, MD, Linda L. Stephenson, MT, and William A. Zamboni, MD, FACS

End-to-Side Neurorrhaphy Using Autogenous Vein Nerve Conduits 637
Jess Ting, MD, Guoli Huo, MD, Vincent Marin, BA, Leif Rogers, MD, Neal Gorlick, MD, Jeffrey Ascherman, MD, and David T. W. Chiu, MD

Thymic Chimerism in Nonirradiated, Immunosuppressed Rats Receiving Microvascularized Limb Transplants 639
Mia Talmor, MD, David Mathes, MD, Milan Kinkhabwala, MD, Ralph M. Steinman, MD, and Lloyd A. Hoffman, MD, FACS

A Difference in Signal Transduction by Tyrosine Phosphorylation: Fetal Rat Dermal Fibroblasts Compared with Adult Rat Dermal Fibroblasts 641
Gyu S. Chin, MD, Thomas Y. Lee, MD, William J. H. Kim, PhD, Dorothy Chau, MD, Michael T. Longaker, MD, and George K. Gittes, MD

Human Fibroblasts in a Mechanically Stressed Matrix Undergo Apoptosis After Stress Removal 643
Mark A. Carlson, MD, Meifang Zhu, BS, John M. Abrams, PhD, and Fred Grinnell, PhD

Keloid Fibroblasts Produce a Reduced Amount of Transforming Growth Factor β_3 Compared with Transforming Growth Factor β_1 and Transforming Growth Factor β_2 Isoforms 645
Steve Lee, MD, Dorothy Chau, MD, Norman M. Rowe, MD, George K. Gittes, MD, and Michael T. Longaker, MD

Gene Expression During Mandibular Distraction Osteogenesis 646
Michael T. Longaker, MD, Babak J. Mehrara, MD, Douglas Steinbrech, MD, Norman Rowe, MD, Matthew Dudziak, BS, Juan Grau, MD, Joseph G. McCarthy, MD, and George K. Gittes, MD

Guided Osteogenesis in Split- and Full-Thickness Cranial Defects of Rabbits and Introduction of Biomechanical Evaluation by Identation Testing..... 649
Murat C. Türegün, MD, James Henderson, MD, James E. Zins, MD, Helen Kambic, MS, and Maria Siemionow, MD, PhD

Treatment of Large Excisional Healing-Impaired Wounds in Diabetic Mice with a Replication-Deficient Adenovirus Carrying the PDGF-B Transgene (PDGF-B/Adv5-CMV) 651
Yukie Kitano, MD, PhD, Antoneta Radu, Karl G. Sylvester, MD, Mark Nesbit, PhD, Meenhard Herlyn, DVM, N. Scott Adzick, MD, and Timothy M. Crombleholme, MD

Comparison of Effects of Adenoviral-Mediated Gene Transfer of PDGF-B in Diabetic Mice and Heterozygous Controls..... 653
Karl G. Sylvester, MD, Yukie Kitano, MD, PhD, Antoneta Radu, Mark Nesbit, PhD, Meenhard Herlyn, DVM, N. Scott Adzick, MD, FACS, and Timothy M. Crombleholme, MD, FACS

Hyaluronidase Increases the Expression of RHAMM Receptor in Granulation Tissue: Implications in Repair..... 655
Joseph A. Iocono, MD, H. Paul Ehrlich, PhD, Gretchen M. Allison, BS, and Thomas M. Krummel, MD, FACS

Collagen Type I Blockade with Antisense Oligonucleotide DNA..... 656
Rahul K. Nath, MD, John N. Jensen, MD, and Adam B. Weinfeld, MD

A Common Single-Strand Specific DNA-Binding Protein Binds Homologous Regions of the α_v-Integrin Subunit, Epidermal Growth Factor Receptor, and ets-2 Transcription Factor Promoters in Keratinocytes..... 658
Lawrence T. Kim, MD, Jianhua Wu, MD, PhD, and Richard H. Turnage, MD, FACS

Differential Effects of Transforming Growth Factor β_1 and β_3 on Excisional Fetal Rabbit Wounds 660
David A. Lanning, MD, Benedict C. Nwomeh, MD, Steven J. Montante, MD, Hallene A. Maragh, MD, Dorne R. Yager, PhD, Robert F. Diegelmann, PhD, I. Kelman Cohen, MD, FACS, and Jeffrey H. Haynes, MD

Gene Expression of Transforming Growth Factor (TGF) β_1, TGF-β Receptors I and II, and Insulin-Like Growth Factor I and II During Mandibular Bone Fracture Healing 661
Joseph K. Williams, MD, Douglas S. Steinbrech, MD, Babak J. Mehrara, MD, Norman M. Rowe, MD, Matthew E. Dudziak, BS, Pierre B. Saadeh, MD, Joseph G. McCarthy, MD, George K. Gittes, MD, and Michael T. Longaker, MD

Optimizing Osteoinduction within Hydroxyapatite Biomaterials 663
Liansheng Song, DDS, Arun K. Gosain, MD, FACS, Marco T. Amarante, MD, Paul G. Nagy, Charles R. Wilson, PhD, Jeffrey M. Toth, PhD, Larry C. Chow, PhD, Mark Yamaguchi, BS, and John L. Ricci, PhD

Chapter XVII—Urology/Reproductive Biology

Effects of Unilateral Testicular Torsion on Blood Flow and Histology of Contralateral Testis 666
Linh Bao Nguyen, MD, Gonzalo Lievano, MD, Luna Ghosh, MD, Jayant Radhakrishnan, MD, MS, FACS, Linda Carol Fornell, MT, and Eunice Gertrude John, MD

The Role of Nitric Oxide in Regulating Testicular Blood Flow and Testosterone Production During Sepsis 667
Albert D. Sam II, MD, Avadhesh C. Sharma, PhD, William R. Law, PhD, James L. Ferguson, PhD, and H. Bruce Bosmann, PhD

Dynamic Graciloplasty: Sequential Segmental Neuromuscular Stimulation Improves Neosphincter Performance 669
Gustavo Perez Abadia, MD, Erik Zonnevijlle, MD, Naveen Somia, MD, Richard Stremel, PhD, Steven Koenig, PhD, Martin Palacio, MD, Paul Werker, MD, PhD, Moshe Kon, MD, PhD, Claudio Maldonado, PhD, Gordon Tobin, MD, FACS, and John Barker, MD, PhD

Overexpression of a New Candidate Tumor Suppressor *PTEN* Gene Causes Decreased Cell Growth Rate and Tumorigenicity in Human Prostate Carcinoma Cells 671
Nelson Gattas, MD, Jerome P. Richie, MD, FACS, and Michael L. Lu, PhD

Preclinical Analysis of Lectin-Triggered Apoptosis as an Alternative Intravesical Chemotherapeutic Strategy for Transitional Cell Carcinoma of the Bladder 673
Andrea L. Waingold, BS, Rita L. Leung, Kevin R. Loughlin, MD, FACS, and Sandra M. Gaston, PhD

Hamster Sperm Nuclear Matrix Contains a Topoisomerase II–Like Protein 675
David P. Murphy, MD, M. Ahamed Saleem, PhD, Kenneth B. Cummings, MD, FACS, Eric H. Rubin, MD, and W. Steven Ward, PhD

Receptor and Postreceptor Mechanisms of Transforming Growth Factor-β Resistance in Human Prostate Cancer Cells 677
Stephen J. Savage, MD, Michael C. Ost, MD, Michael J. Droller, MD, and Brian C.-S. Liu, MD, PhD

Temperature Monitoring and Histologic Evaluation Following Acute Interstitial Renal Cryoablation in the Canine Model 680
David A. Schulsinger, MD, Aaron P. Perlmutter, MD, R. Ernest Sosa, MD, Don Marion, and E. Darracott Vaughan, Jr., MD, FACS

Paclitaxel-Induced Prostate Cancer Cell Growth Inhibition: Modulation by Ionizing Radiation and Interferon-α 681
Marc A. Lavine, MD, Shashi Mehta, PhD, Arvin Glicksman, MD, Hobie Shackford, MS, Barry Stein, MD, and Harold Wanebo, MD

Mechanical Imaging: A Novel Device for Prostate Imaging 684
Robert E. Weiss, MD, FACS, Armen P. Sarvazyan, PhD, DSc, Peter Niemczyk, MD, W. Steven Ward, PhD, and Kenneth B. Cummings, MD, FACS

Microgravity Culture of the Embryonic Mouse Kidney 686
Dale C. Brown, BS, Michael I. Rose, MD, Neil R. Pellis, PhD, Christopher A. Crisera, MD, Kari L. Colen, BA, Patrick R. Connelly, MS, Michael T. Longaker, MD, and George K. Gittes, MD

Renal Vascular Changes in Chronic Ureteric Obstruction Are Mediated by Inducible Nitric Oxide Synthase 688
Nicholas J. Hegarty, MB, FRCSI, Leonie S. Young, PhD, and John M. Fitzpatrick, MCh, FRCSI

Mechanisms of Regional Renal Blood Flow During Ureteric Obstruction 689
Leonie S. Young, PhD, Nicholas J. Hegarty, MB, FRCSI, and
John M. Fitzpatrick, MCh, FRCSI
